A message from the games editor...

Wot I've been doing...
Being visited by the Three Spirits of Christmas. Did nothing for me, though.

Well, ho, ho, ho and a bucket of advocaat! Christmas again, don't ya just love it? All that trying to watch the Big Movie on Christmas afternoon (even though you've already got it on video) while your nearest and dearest shout at the top of their voices. The indigestion. The mounds of wrapping paper. At least we've finally got rid of Noel Edmunds, eh? No matter what other thrills the festive season may have in store for you, we've got plenty to keep you occupied in front of the yule log (three bar) fire. Not least of which is the first part of our official *Ecks Vs Sever* guide, and more chances to win top games and GBAs than ever before! Who said the Christmas spirit is dead? Have a good one! Look at the bites on her neck!
That's the last time I ever give Cyra a game like Vampire Shafters 37 to review. She took one look at the opening animation and has been crying under her desk ever since. I wouldn't have minded, but it's a crap little GBC platformer with graphics worse than a Commodore 64 game! However, I am also now sleeping with the light on. Jem

"The best game I've ever played. But I wouldn't buy it."
it's a Hum Dinger!

Right about here you can see whether the game has any of those all-important extras that make it so special. We've also got the link to the official Web site for you, and most importantly of all, the price!

We've also suggested other games that may take your fancy... and they might be cheaper!

One of the team may be yumming up a new title, but sometimes it's a matter of opinion, so let's see if we're all in agreement!

We've tested the strength of every title in the issue. It may be fun, but will it last more than a day's playing? If so, it's bound to come out a Hum-Dinger

Mortal Ko

Move Over Potter!

Strategy action = wizarding good show!

For anyone out there who can't help but scream every time they see another piece of Harry Potter™ merchandise, Bits Studios is about to unleash a far more cerebral slice of gaming magic, thanks to Wizards – the GBA incarnation of GBC classic *Warlocked*. Due out in just a couple of months, this innovative real-time strategy adventure is bound to fill the gap left by *Advance Wars*' cancellation. And it's also bound to cash in on this endless Potter-mania too!

CRAP! SCRAP! mbat Advance

Torso-rippin'-fight-finishin'-snow-mannin'-head-bangin' KOMBAT... The next level?

Even in this Advanced new century, the Game Boy (in fact, Nintendo in general) has an undeserved reputation for being nothing but kids' stuff, generating a world of smiley hills, cute pink things and braindead little monsters. This release is bound to do just a bit to dent that squeaky clean image, and hopefully cause a little controversy, just as the original did many years ago.

To The Death!

Because *Mortal Kombat* (for all its promotion of bad spelling) is the ultimate in violent, dark, gut-wrenching beat-'em-ups, questions have been raised in the house and warnings have been stamped on the box, but we all just keep yumming it up. Since generating a couple of iffy movies and an even iffier brace of adventures entitled *Mortal Kombat: Mythologies*, the denizens of the Outworld have been a little quiet of late. However, that's soon to change with a whole host of next-generation-console scrappers, and this exciting new handheld translation: the ultimate in portable *Mortal Kombat* action!

As it's basically a pixel-perfect port of *Ultimate Mortal Kombat 3* (with one exception being the absence of four-armed nasty Sheeva) this is going to be one GBA title sure to impress. Every single unmissable Fatality and Friendship is in place, allowing you to either take pity on your foe, rip their lungs out, or turn them into a snowman. It's always been this range of options and the many hidden moves that have made *Mortal Kombat* such a must-have game over the years.

Finish It!

Luckily, we can all rest assured that this version will boasts full two-player link-up options (although it's still not certain whether this will be available with just the one cart) and the remaining 24 fighters are all in place. The graphics look superb for a handheld fighting game, and we just can't wait to start scrapping away with the link-up. Only a couple of months to go now until that croaky-voiced man says those immortal words: 'FIGHT!'

Hark! The Charlie's Angels Thing!

Miniature beauties kick GB Ass!

Despite the fact that Ubi Soft has some of the biggest names in movie history on their list of videogame licences (*ET*, *Planet Of The Apes*, *Batman*, *Crouching Tiger: Hidden Dragon* and, er, *Men In Black*) it's certainly hit the jackpot with its latest acquisition: *Charlie's Angles*!

You will get the chance to join the legendary glamorous taskforce, playing as either Natalie, Dylan or Alex in their usual high-kicking, lip-smacking, heavily accessorised adventures when it finally crops up some time soon for the Game Boy Advance. The movie was a massive success, so hopefully we can expect similarly unmissable action in this game – well, who cares? We've always wanted our own miniaturised Cameron Diaz.

Over The Top, Lads?

War is hell for little green men.

We thought *Army Men Advance* was a great game, despite the fact there were only enough levels to keep you busy for half an hour. Surprisingly, for this miniaturised military jaunt, 3DO has decided to go back to the old GBC version of the game, with tiny but realistic design and missions, instead of the fun cartoony style we all celebrated.

Having played it, we can tell you that there's a lot of impressive detail on this little cart, with very swish visuals, but you'll have to wait until next issue for our full, exclusive review.

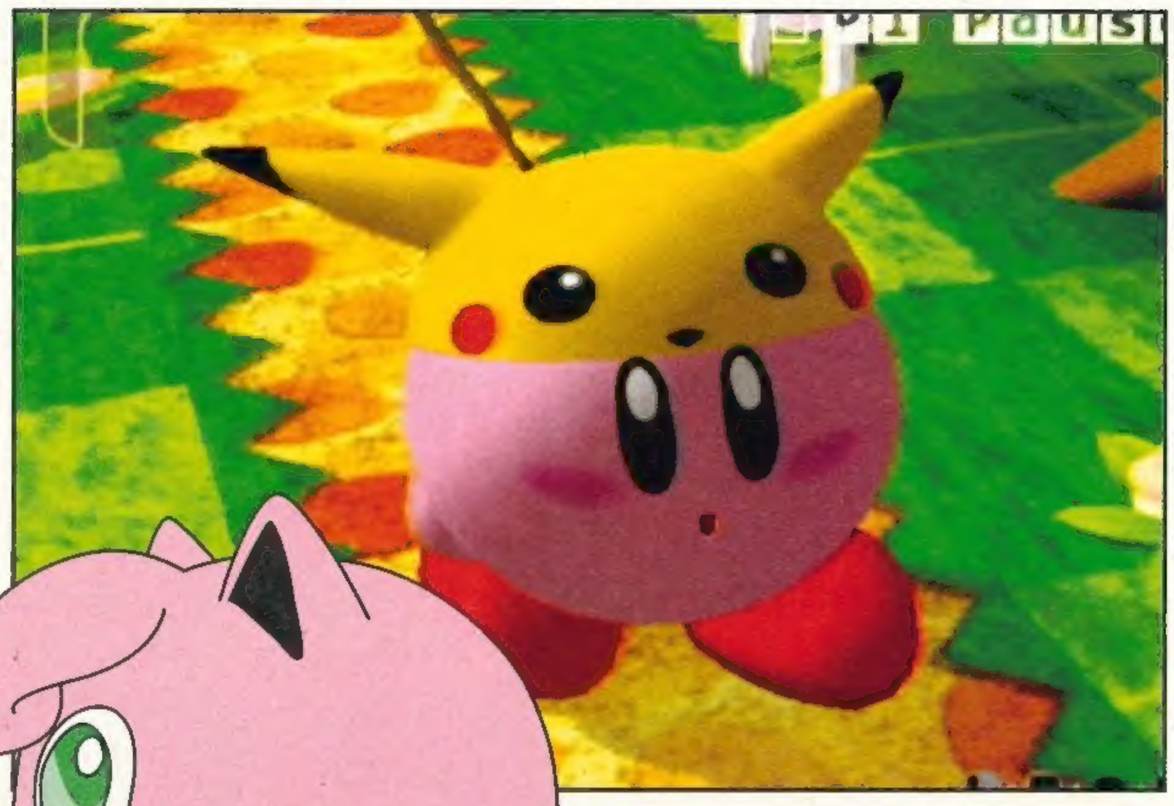
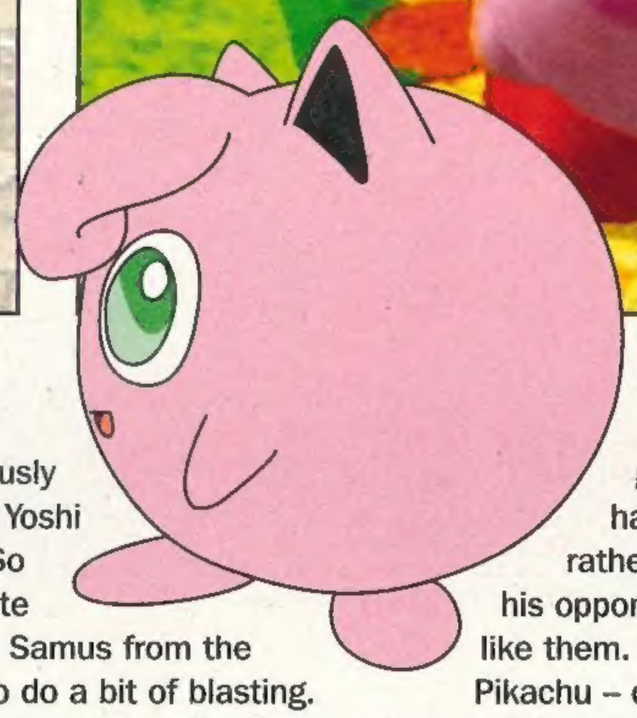
Tennis: The Next Generation

Woolly balls all round on the GBA.

Tennis fans who've explored every single avenue of classic GBC adventure *Mario Tennis* (okay, so it's only been out a year, but it's still a classic!) will be pleased to note that the first GBA tennis offering will be on the shelves in February. *Next Generation Tennis*, developed by sports geniuses Spark Interactive, will give players the amazing option to play a great game of doubles thanks to four-player link-up, with only one cartridge! Add to that loads of game options and superb graphics, and it's certainly one to salivate over, even if you don't dig tennis!

Big Boys Battle!





What's this Super Smash Bros all about then?

It was two years ago that Nintendo released its multiplayer fighting game, *Super Smash Brothers*, onto the N64. Now the whole gang is back for the biggest scrap ever on the GameCube! Obviously Mario is there, as are Yoshi and Princess Peach. So too is Star Fox favourite Fox Mcloud, and even Samus from the Metroid games gets to do a bit of blasting. However, Pokémon fans will be on the lookout for everyone's favourite Pokémon, Pikachu, who is there along with Jigglypuff, Mewtwo and Pichu for company, all ready to duke it out with Ninty's finest. Only Pikachu is selectable from the start, though – as with other secret characters, including Ganondorf, Luigi and Young Link, you'll have to complete various parts of the game to unlock the other Pokémon. There are even rumblings that it may link-up somehow with *Mario Advance 2* (hence the new shots!) but we'll have to see...

One of the best things about the game is the way that you use power-ups to help you to win the battles, including a vicious Poké-ball. If you can manage to grab one before your opponents get to it (or it just disappears) you will unleash a little Pokémon onto your opponents – including, Cyndaquil, Venusaur, Blastoise, Bellossom, Chikorita, Togepi, Wobbuffet, Chancey, Suicune, Moltres, Zapdos, Articuno and Unowns – if only for a little while...

Each character has their own special bonuses. Samus and Fox have guns, Jigglypuff can fly and Pikachu has a lightning attack. However, we rather like Kirby! He has the ability to eat his opponent and then starts to look and act like them. It's really cool when Kirby swallows Pikachu – check out the shot and you'll see what we mean! Is this a new Pokémon? Pikaby or Kirbachu? Any which way, this is an amazing celebration of everything that Nintendo stands for – fun, fun and FUN! And a little bit of violence. Bet you can't wait...

GBA AND GAMECUBE!

We're still to see the full extent to which using the GBA as a GameCube controller opens up these amazing new games, but we do have an official list of all the GameCube games that will be able to interact with Game Boy Advance titles...

- ***Kirby Tilt 'N' Tumble/Kirby* TBC**
- ***Sonic Advance/Sonic Adventures 2***
- ***Animal Forest* (Plus) on both GameCube and GBA**

There's still a lot of mystery as to how this is all going to work, but we'll soon see when *Sonic* is finally available to buy! This is the right place for all the latest, as soon as it's available!

Nintendo Rules The World: It's Official

GameCube wipe the floor with nerdy rivals!

There's more than enough reason this Christmas for Nintendo to be drinking a celebratory hot toddy – with the GameCube officially rated as the fastest-selling console in US History, and *Luigi's Mansion* feted the most popular launch game ever! Outselling Bill Gates' Xbox two to one, the little blue marvel won't be out here until the spring, but it'll be interesting to see how it fares this side of the Atlantic!

Get The Sticky Tape, Mutha!

Broken Sword swipes onto the GBA.

This point-and-click graphic adventure was rather successful in Europe, but failed to set the PC gaming world alight. Still, the PlayStation version sold well and this GBA conversion looks pretty darn amazing. And so it should – it's coming from bam! Who has proved in the past that it knows how to put together a satisfying GBA package.

If these magnificent shots leave you a little in the dark, it may be worth knowing that the action of the game follows 'George Stobbard and Nico as they team up to thwart the cataclysmic climax to a conspiracy that has run through the centuries'. So it's not a comedy then.

But who cares, you can tell from even a brief play of the existing code that this is an amazingly close conversion, and will stretch the GBA's capabilities to the max, which is more than you can say for most Advance titles so far. The original music (by *Inspector Morse* composer Barrington Pheloung) is in place, and the action, dialogue and challenges will ape the PlayStation and PC versions extremely closely. Adults of all ages should be counting the days for this one.

One Man And His GBA

More Japanese craziness - and we have the shots!

Empire Interactive has been busy badgering away on this... a sheep-herding simulator. We don't know quite what to say, but judging by the size of the little kid's eyes, *Sheep* (a nice, straightforward title!) must be very Japanese inspired, which means that it's bound to be loopy. And loopy is always the way to go, so we're really looking forward to this one. I must buy a whistle.

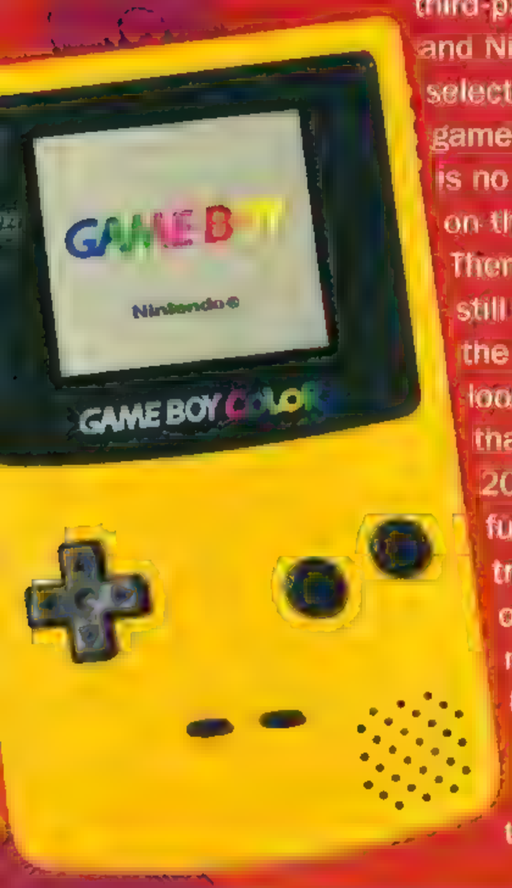
OUT NOW

A Year In

Twelve months is a long time in the life of a games console and the Game Boy has made huge leaps forward this year in both technology and software. With plenty of third-party support and Nintendo's own selection of great games, there really is no better console on the market. There's plenty more still to come and the games are looking better than ever. Before 2002 gets into full swing let's treasure a few of the most memorable handheld highlights from the past twelve months.

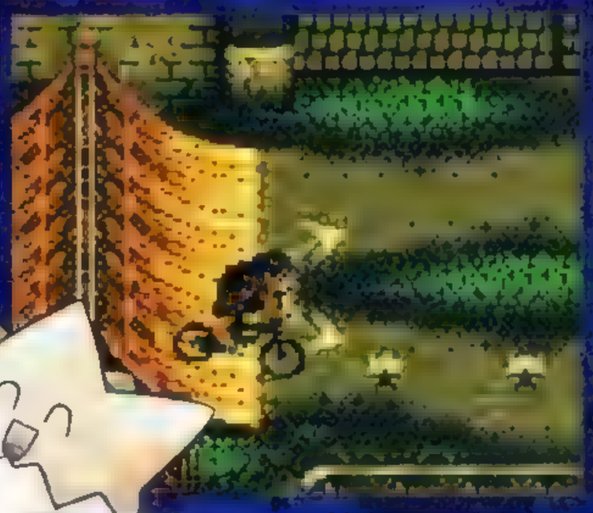


First Quarter

With all the games manufacturers competing for the Christmas number one, the first few months of 2001 were a little quiet. There were a few surprises for Game Boy fans everywhere when *Mario Tennis* arrived and sent us spinning into an early build-up for Wimbledon. Among the other big games launched in these first few months were *Lego Stunt Racer* and the eagerly awaited Amiga classic *Cannon Fodder*.

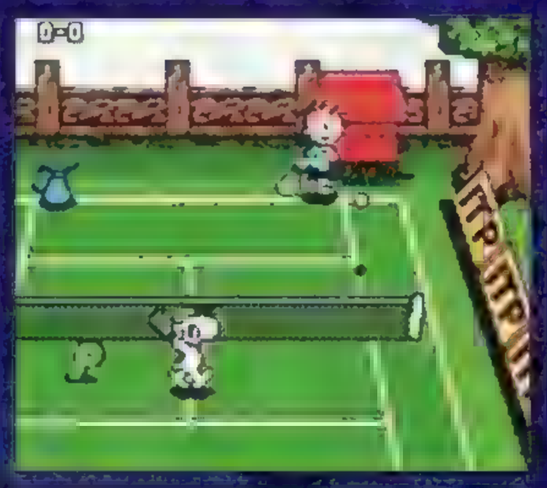
Second Quarter

Easter arrived and with it came a whole feast of delightful games for your favourite console. Another 101 new Pokémon arrived in the form of *Pokémon Gold* and *Silver* and Mat Hoffman showed us all how to ride a BMX. Disney came back to the small screen with *Alice In Wonderland* and *Mickey's Speedway USA*, and (at last) *Harvest Moon 2* became available for all the fans of the farming classic.



Review

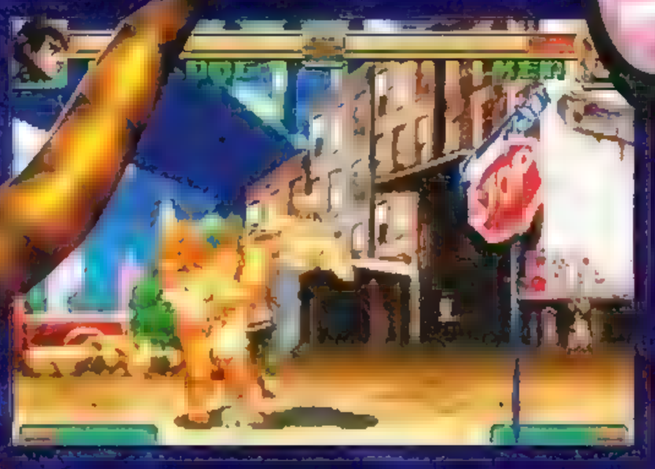
Third Quarter

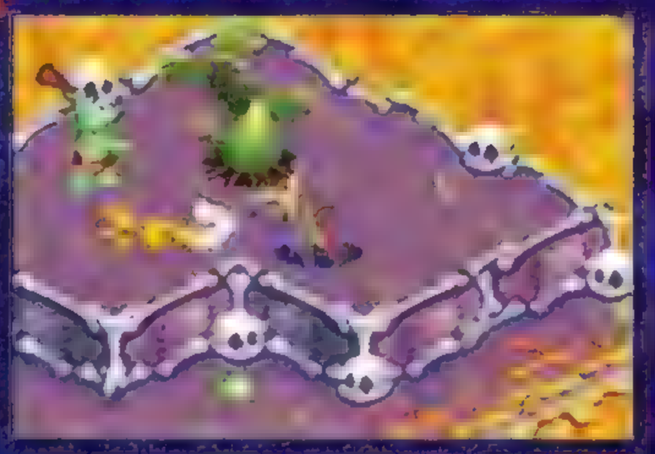


After all the months of waiting, the Game Boy Advance finally arrived and opened up a completely new chapter for handheld gaming. The 32-bit processor produces a wonderful crisp image and the developers had been hard at work getting games ready for the big day. Among the highlights of the launch were *Super Mario Advance*, *Tony Hawk's Pro Skateboarding 2* and a brand-new *Castlevania* adventure. The Game Boy Color was not too overshadowed by the new arrival and also grabbed a few Hum Dingers, with *Colin McRae Rally* and *Snoopy Tennis* both getting excellent reviews.

Fourth Quarter

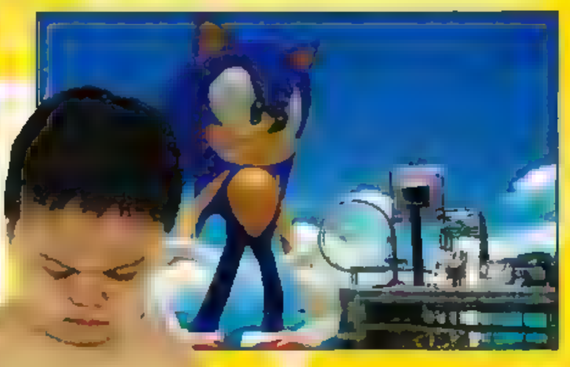
There were just so many brilliant games released in the last part of the year and plenty of titles made it to the shops in time for Christmas. *Mario Kart Super Circuit* finally arrived after what seemed like months of waiting and *Spyro The Dragon*, an old PlayStation favourite, made a very impressive debut on the Game Boy Advance. *StreetFighter* made a comeback and Harry Potter took centre stage everywhere. Among the other magical handheld moments were the arrival of the new *Zelda* adventures and also *Pokémon Crystal* on the Game Boy Color.





We Want More!

The Game Boy Advance is only six months old, but we have seen some fantastic games hitting the shops already. What is even more mouth watering is the prospect of what lies ahead for the new console. Rare's quartet, including *Diddy Kong Racing* and *Banjo Kazooie*, are on their way and one of Sony's long-standing heroes, *Crash Bandicoot*, will be making an appearance on the GBA. We also can expect the UK launch of GameCube and even more top quality games. Bring it on Nintendo, we want more!



Get Yourself Connected!

Nintendo's latest dream console the GameCube has been designed to work in harmony with the Game Boy Advance. There have already been two confirmed releases that will make use of this compatibility, which are SEGA's mascot Sonic and Nintendo's very own pink puffball Kirby. More announcements are expected in the New Year, so stick with Total GB, and we'll bring you the full details... when they happen!

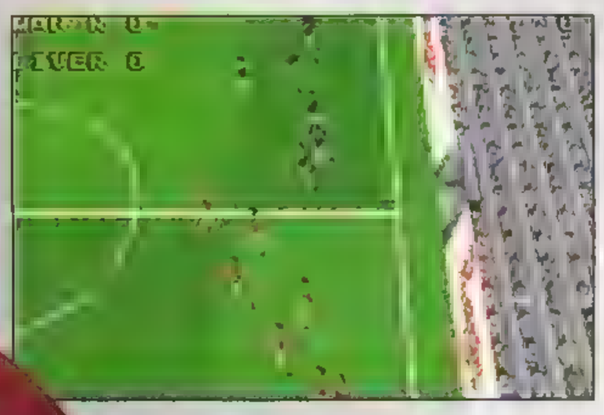
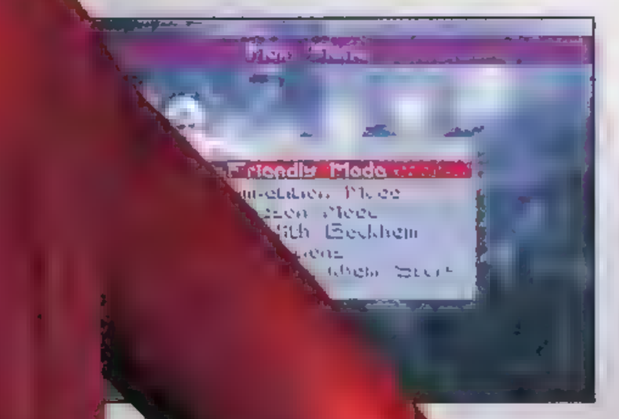
THE UNFAIR ADVANTAGE

David Beckham Soccer

He's the best footballer this country has produced since Best - but can his game cut it on the GBA?

Yes, finally we have the chance to carry the country's greatest footballer around in our pockets – but the question is, should we really bother?





David Beckham Soccer is a welcome addition to the footy market, which has been dominated by just two giants, *International Superstar Soccer* and *FIFA*. Rage's brilliant arcade-style kick about should change all that, as this really is a fast and highly addictive football extravaganza!

Good Shot

David Beckham Soccer has a top-down view that is similar in style to the classic *Kick-Off* games of the Eighties, although the players are more detailed here and you'll need more skill in order to get those goals. Luckily, the game features an extensive Training mode, where you can learn exactly how to pull off the best free kicks etc, etc – so playing through this should prepare you for the huge number of modes in the main game. Whether you want to play a single kick about game or trawl through a whole competition, *David Beckham Soccer* has it all.

On Target

The graphics are very clear and colourful, and the GBA screen allows you to see a considerable amount of the pitch at any one time – and so you can plan all those fancy moves that you learnt during your training!

Add to all this The David Beckham Story (which gives you all the info on the great man himself) and you have a brilliant arcade/sports title that certainly deserves a place in your GBA. This one definitely collects all three points!

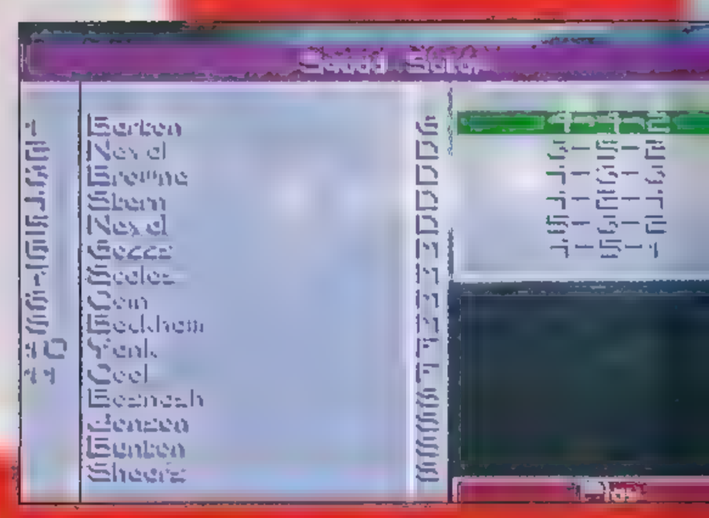
Giant Tony

In my opinion...

Wow! This game is all the Rage!

We got a very early sneaky peak at this game months ago and we did the usual excess nodding while looking at the animated bloke and then ran out to have our tea. Collecting another thing altogether. When you've had Beckham on this then invigorating amongst a footie game with everything you need for a smash hit. Top, job done good.

Simon

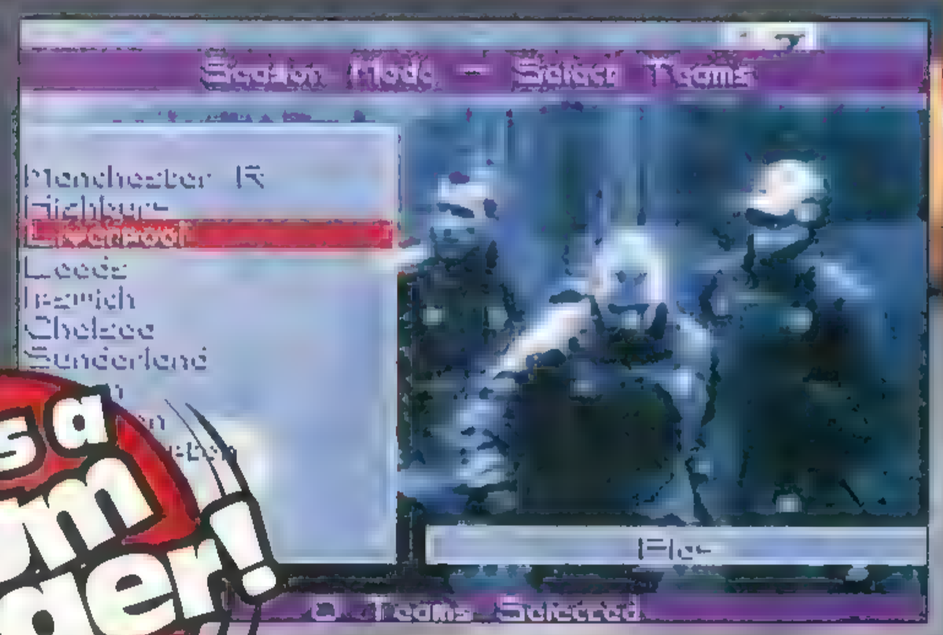


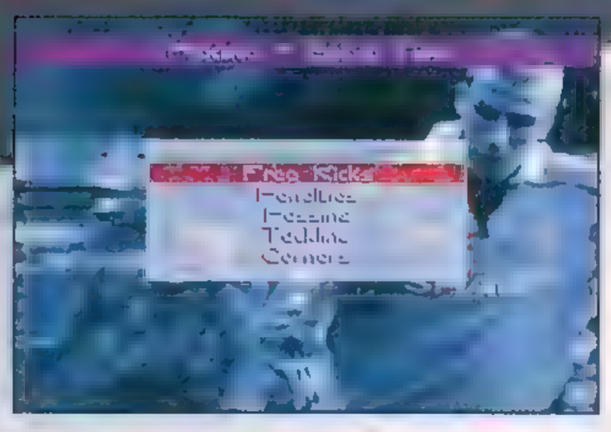
Becks Ain't Human!

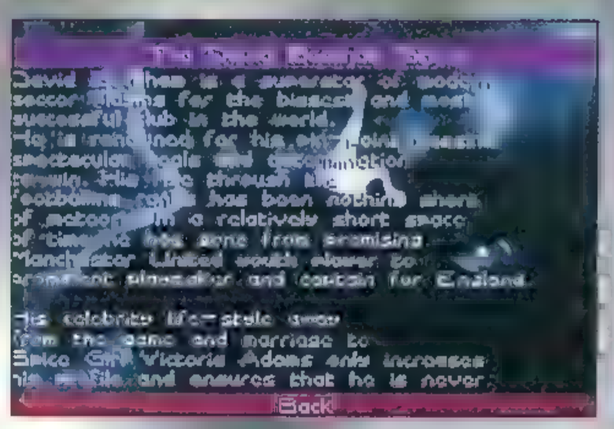
The adverts put together by Rage to plug their footy game are brilliant. Our boy David is scanned and a new version is recreated – a mutant Beckham with a Joypad port in his head. Rumours that Victoria didn't noticed the difference have been fabricated for the sake of a good joke.

The ref blows the whistle and suddenly all 22 players are transfixed by the ball's beauty.

I bet those three David Beckhams have a good old laugh about days of yore when they get together.





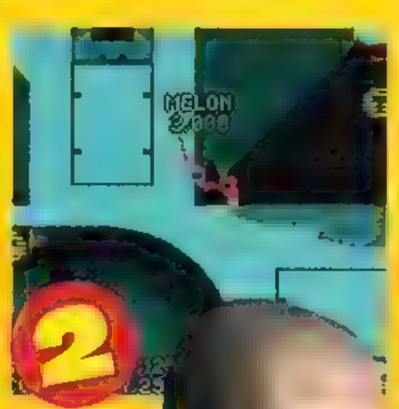


"Whether you want to play a single kick about game or trawl through a whole competition, David Beckham Soccer has it all"

Sport-tastic

If you like sports games, why not check out these other titles for your GBA and GBC. Here's our favourite five that are endorsed by top sportsmen:

No.	Title	Console	Reviewed issue	TGB Rating
1.	Mat Hoffman's Pro BMX	GBC	18	97%
2.	Tony Hawk's Pro Skater 2	GBA	19	94%
3.	Colin McRae's Rally	GBC	20	90%
4.	Steven Gerrard's Total Soccer	GBA	22	85%
5.	Jeremy McGrath Supercross	GBC	09	71%



In my opinion...

Some of the crowd are on the pitch!

Well, I've gotta hand it to Rage, this game's a blinder! Great graphics, loads of different competitions – once you've played it you won't put it down. And looking at the group England's drawn for the World Cup (Nigeria, Argentina and Sweden?!?!), you'll be better off playing this than watching the matches (and David) on TV next summer. A must for all footie, sports and Beckham fans!

He's football crazy, football mad... and so are we!

Resident E

First it was on and then it was off. Finally, however, Game Boy Color owners can get to grips with the Resident Evil experience. Best don those brown trousers.

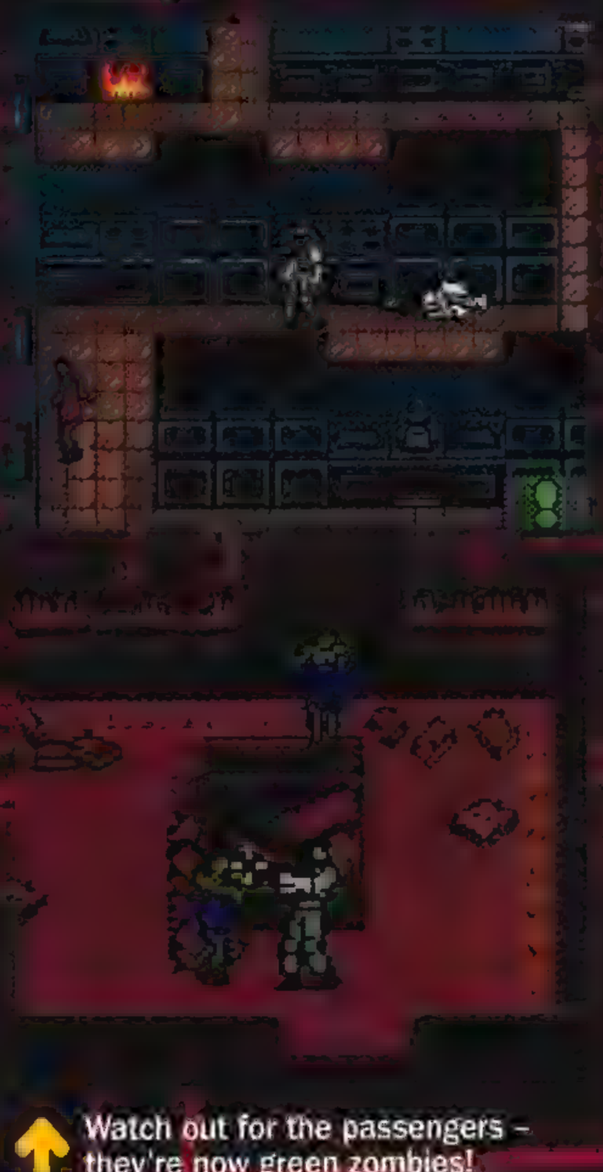
It seems like donkeys' years since Capcom announced it was bringing *Resident Evil* to our beloved GBC. Anyway, after a massive wait we can finally indulge in some zombie-mashing action on our favourite handheld. First things first, if you're expecting a direct port of any of the previous *Res Evil* games then you'll be in for a bit of disappointment. You see, this is an entirely new adventure, designed especially for the GBC. You control Barry Burton (Bazza appeared in the original PSone *Resident Evil*) a hard as nails special agent who has been called in to investigate some mysterious goings on, on a pleasure cruiser called 'The Starlight'.

Once on board, it doesn't take long before you work out that something has gone horribly wrong. The crew of the ship and the passengers have all been transformed into flesh hungry members of the undead.

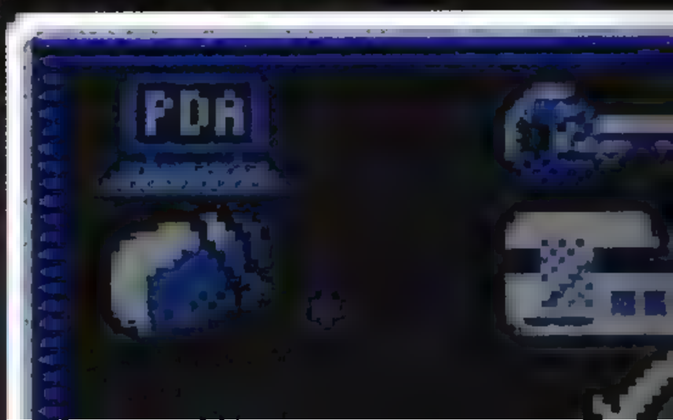
The root of the problem can be traced back to the B.O.W. (Bio Organic Weapon), it's your job to destroy the B.O.W., cleanse the ship of zombies and rescue any survivors. The action is viewed from a forced overhead perspective and involves exploring the ship, solving puzzles and (of course) blasting the zombies back to hell.

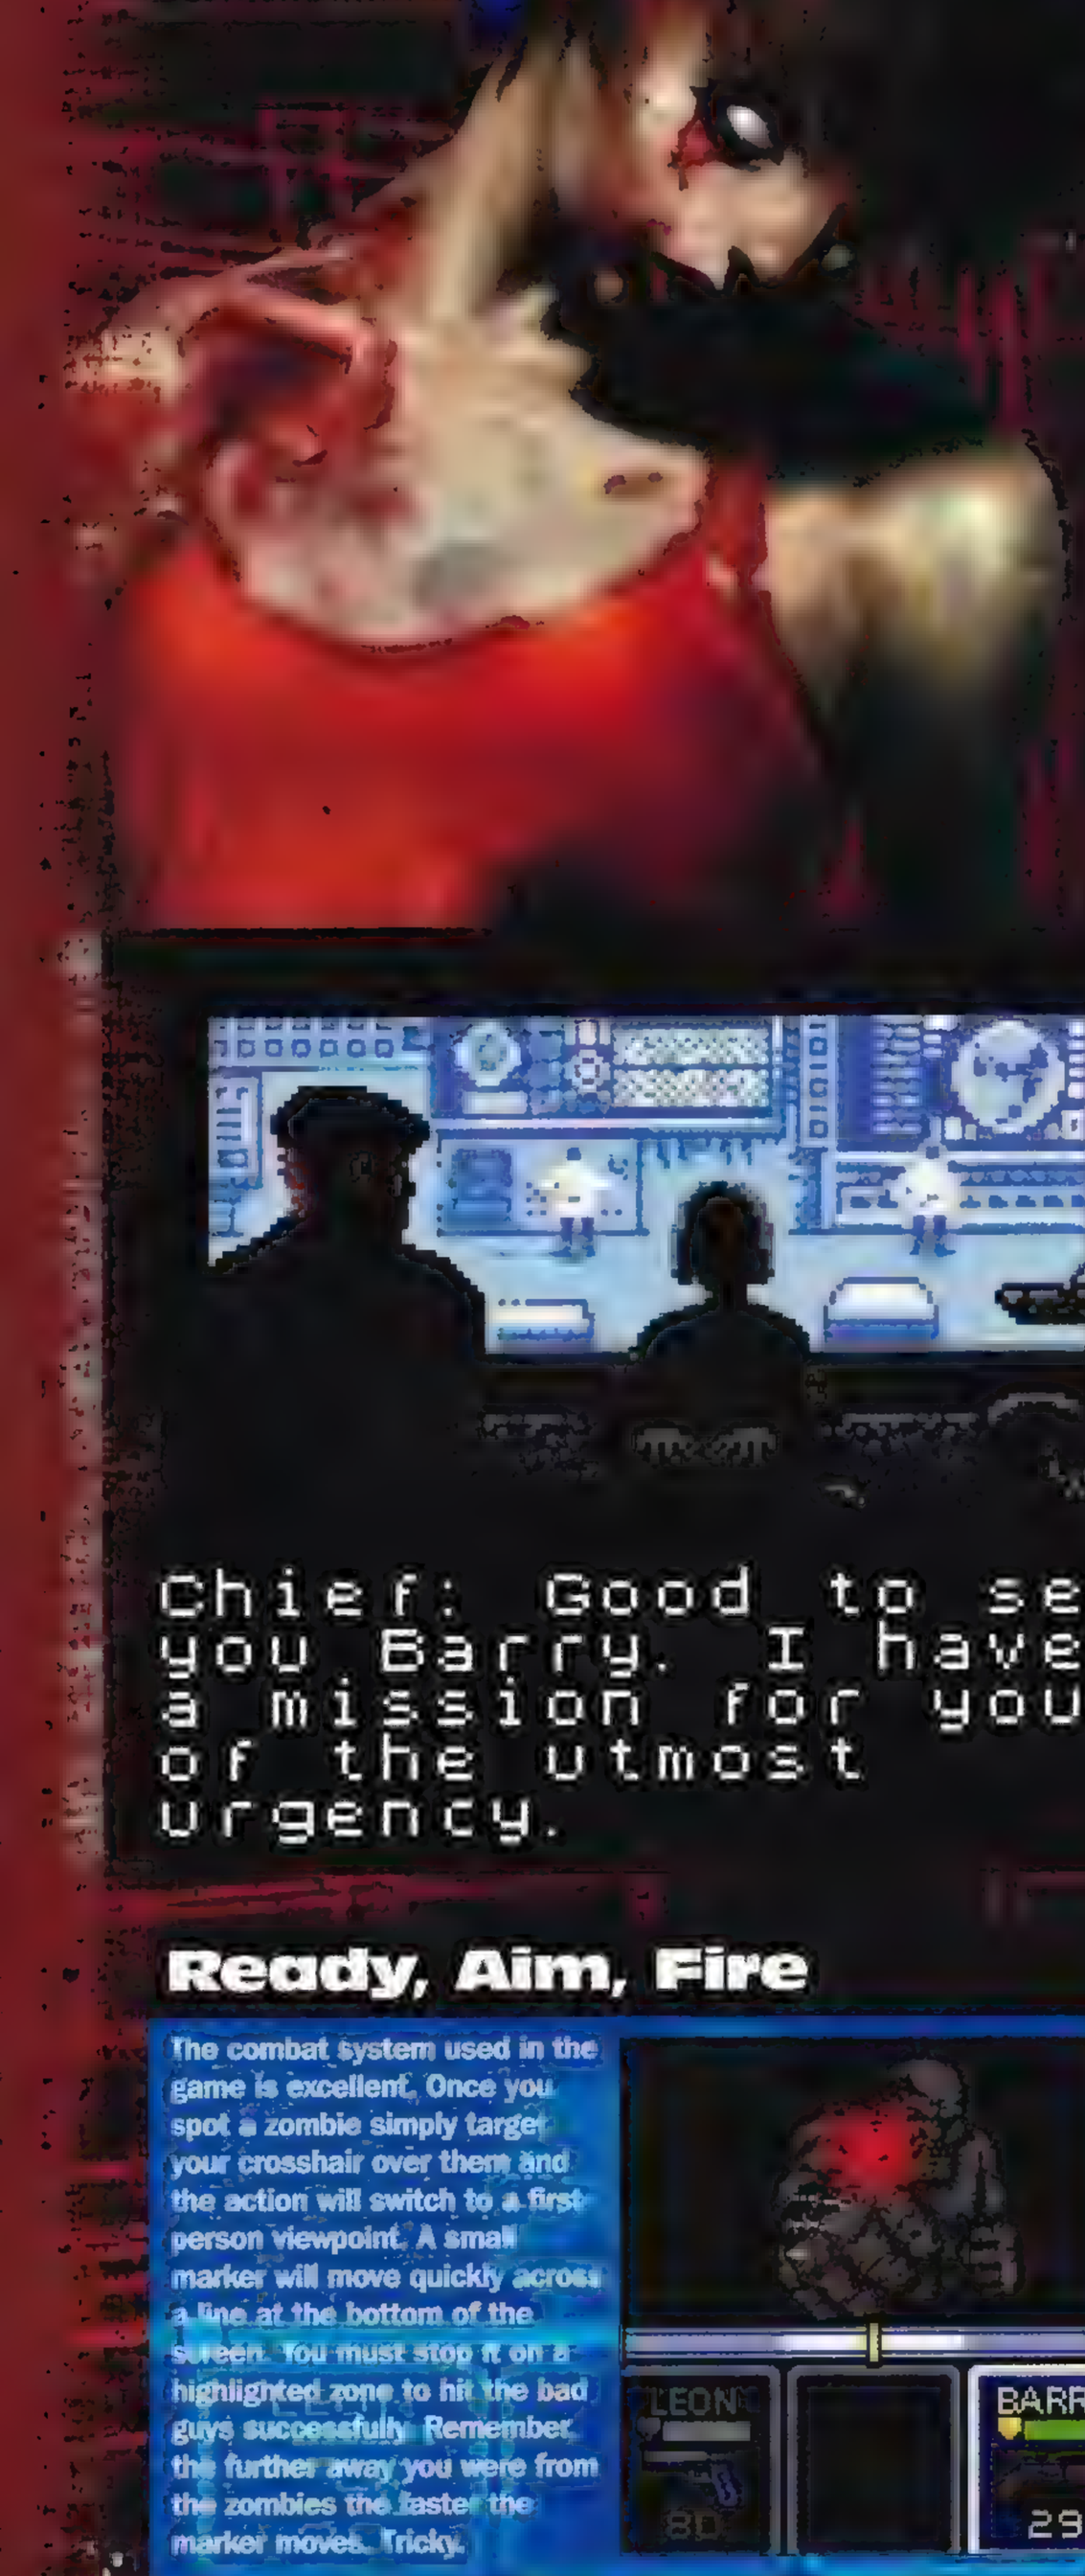
Monster Mash!

The combat system is really well designed, basically you target any bad guys on the screen and then your view switches to a first-person-view. Here you can see the zombie(s) up close. At the bottom of the screen is a line with a



Watch out for the passengers – they're now green zombies!

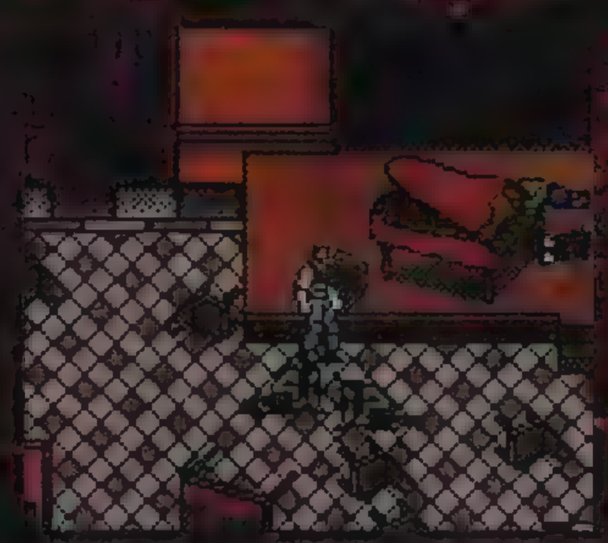




Ready, Aim, Fire

The combat system used in the game is excellent. Once you spot a zombie simply target your crosshair over them and the action will switch to a first person viewpoint. A small marker will move quickly across a line at the bottom of the screen. You must stop it on a highlighted zone to hit the bad guys successfully. Remember the further away you were from the zombies the faster the marker moves. Tricky.

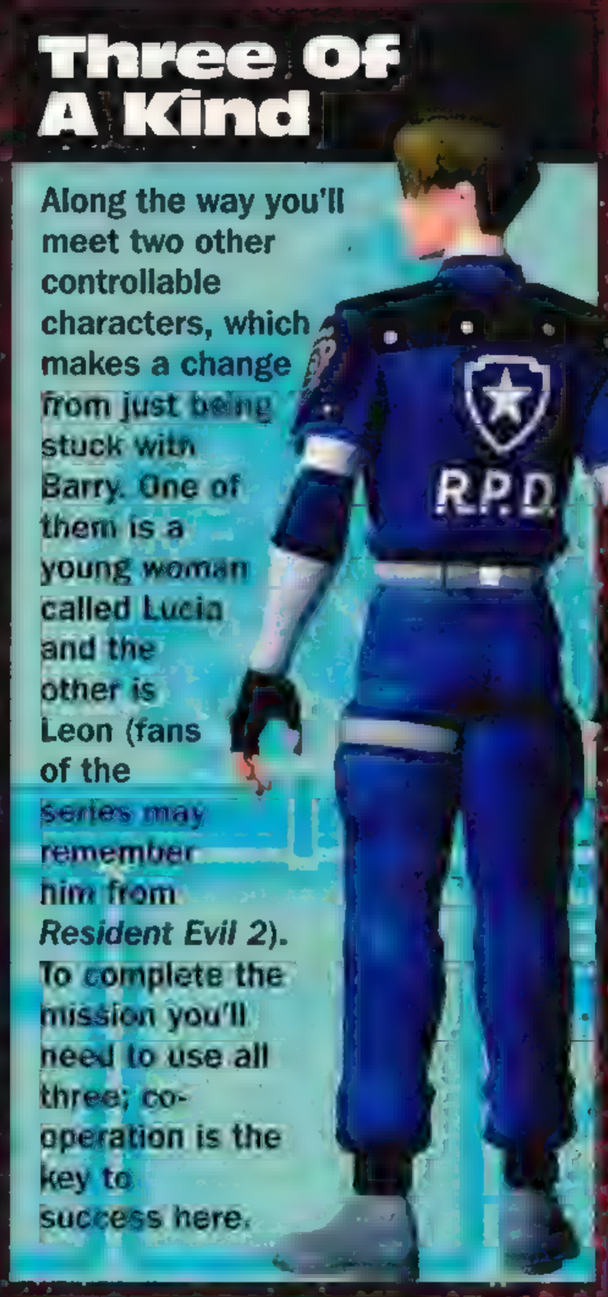
Evil Gaiden



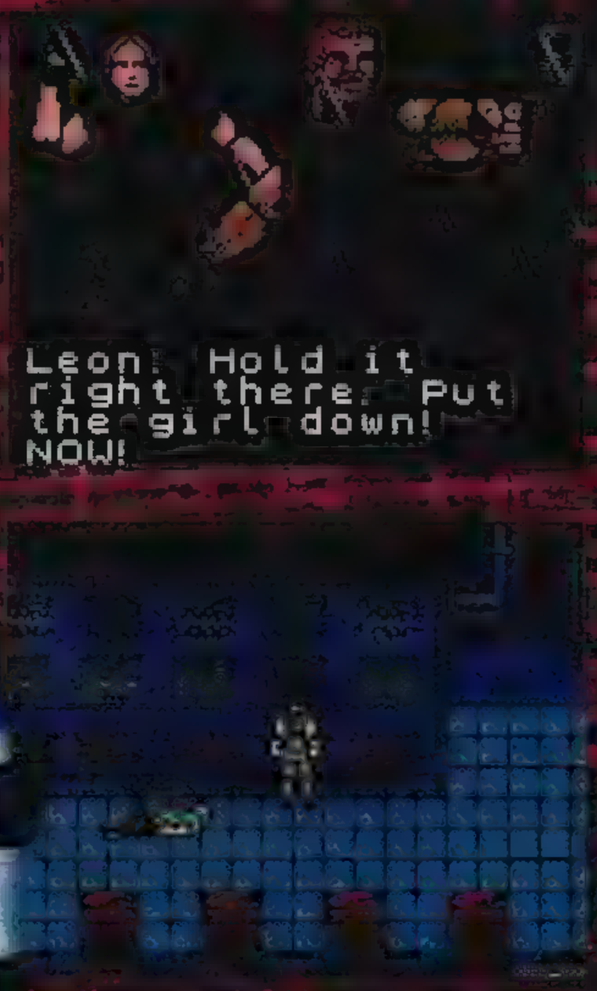
marker rapidly moving sideways. Along the line are hit points, by stopping the marker on these you can fire shots at the zombies. Spot-on timing is required and if you take too long the zombies grab hold of you and take a bite (ouch). *Resident Evil Gaiden* looks nice, has a gripping story line and will keep you glued to your GBC for hours. If you're after a title that will send shivers down your spine then this should be your next purchase. Who knows, this may be the only time you get to play *Resident Evil* on the handheld system, so make the most of it.

Giant Tony

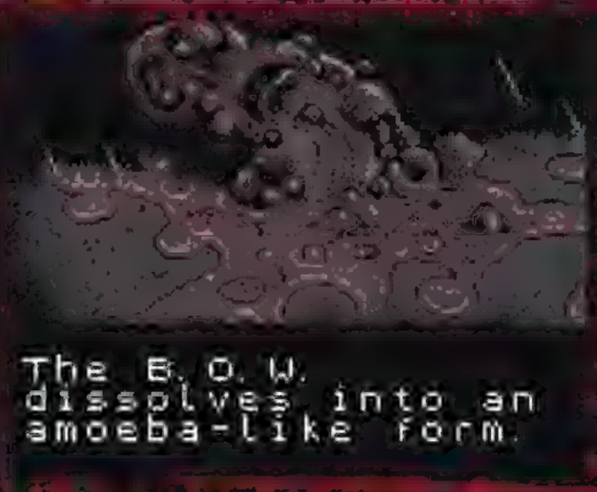
Three Of A Kind



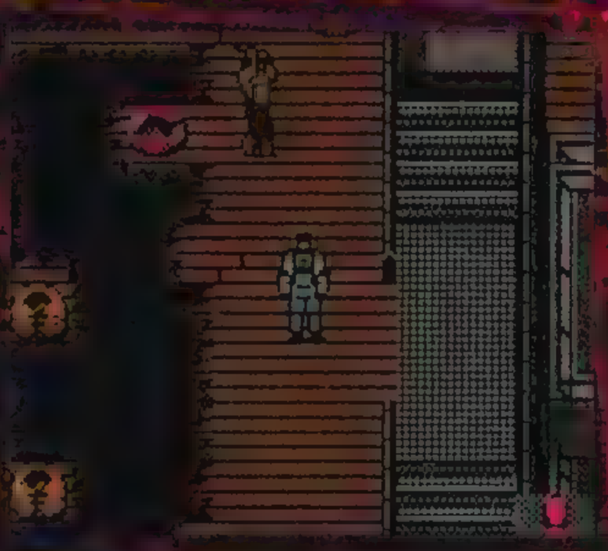
Along the way you'll meet two other controllable characters, which makes a change from just being stuck with Barry. One of them is a young woman called Lucia and the other is Leon (fans of the series may remember him from *Resident Evil 2*). To complete the mission you'll need to use all three; co-operation is the key to success here.



You'll not get bored, gameplay's fun and there are great puzzles too.



"Resident Evil Gaiden looks nice, has a gripping story line and will keep you glued to your GBC for hours"



We loved exploring the huge ship and blasting the zombies.

In my opinion...

This is survival horror at its scariest.

I never thought we'd see *Resident Evil* on the GBC, but here it is. This is an absolute blast. Exploring the massive ship will keep you playing this for ages and blowing away the foul zombies never gets boring. *Resident Evil Gaiden* has great looking graphics and gameplay to match. Horror fans shouldn't be without this.

Planet Of The Apes

Primates with guns! Too much monkey business for the GBA?

This game sneaked out onto the shelves without much fuss, which begs the question: why wasn't it plugged a bit more? What's wrong with it? Actually, this cart contains quite a lot of surprises – and not all of them bad...

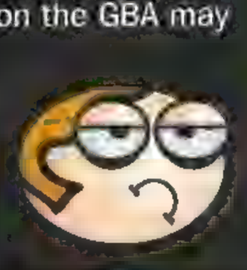
They Did It!

Firstly, it doesn't seem to be based on the recent Tim Burton movie at all, the scene being set by misty illustrations that places the original crash (that strands the hero on an unrecognisable planet peopled by upright primates) firmly in 1973. The game also has an eerie seriousness about it, more in line with the original French novel than any TV or movie version of *Planet Of The Apes*. However, there's a lot here that simply can't be taken seriously. The monkeys that amble amiably right and left waiting for you to shoot them never fail to raise a snigger, whereas the stupid password system and awful music are more likely to simply annoy you.

They Actually Did It, The Baskets!

What's also interesting is whether the game designers paid the creators of *Prince Of Persia* or not, as this side-scrolling platformer is practically identical to the Amiga classic. The main character animation is almost pixel perfect to *Prince of Persia*, with realistic hanging from cliffs, crouching, inching and, of course, falling to your death on pikes. But then *POP* has many fans, and there's no denying the interesting gameplay in *POTA*. Fans of the franchise may be disappointed, but anyone who wants to see a realistic, classic-style platformer on the GBA may get a lot out of the challenges here, if they can make out the tiny graphics.

Jem

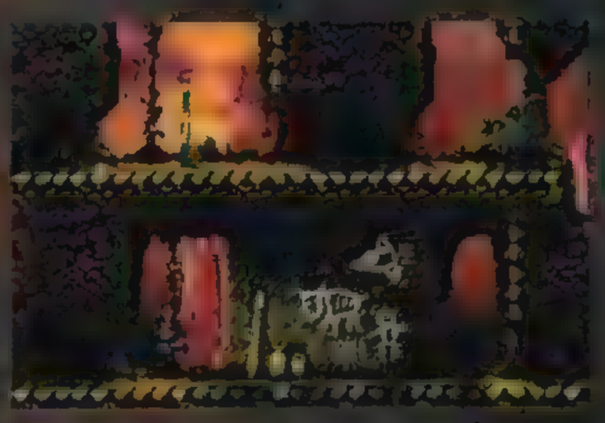


In my opinion...

Ooh-ooh-ooh, I wanna be like you-oo-oo...

Seeing as how the film was awful, there wasn't much to expect from this game... but it's actually not that bad. Sure, there are problems – the enemies are really stupid and the controls are a bit clunky, but it looks real pretty and is quite fun to play. It certainly isn't the greatest game around, but you'd hardly expect it to be...

Giant Tony



Oh look it's a man standing still in a strange place. Scintillating.

COR! It's a man standing still in the middle of nowhere! Extraordinary!

Universe Of The Apes

Based on an original novel by French writer Pierre Boulle, the first cinematic outing for the *Planet Of The Apes* was a smash-hit success in 1968. Starring Charlton Heston as the human astronaut stranded on the mysteriously primate-peopled planet, the movie was so successful it led to four sequels, a TV show and a cartoon. One of the biggest cult sci-fi favourites ever, *Batman* director Tim Burton took a massive risk earlier this year with his own 're-imagining' of the original story for the 21st Century. Most people hated the movie, but it was a darn sight better than any of the earlier sequels, so there.

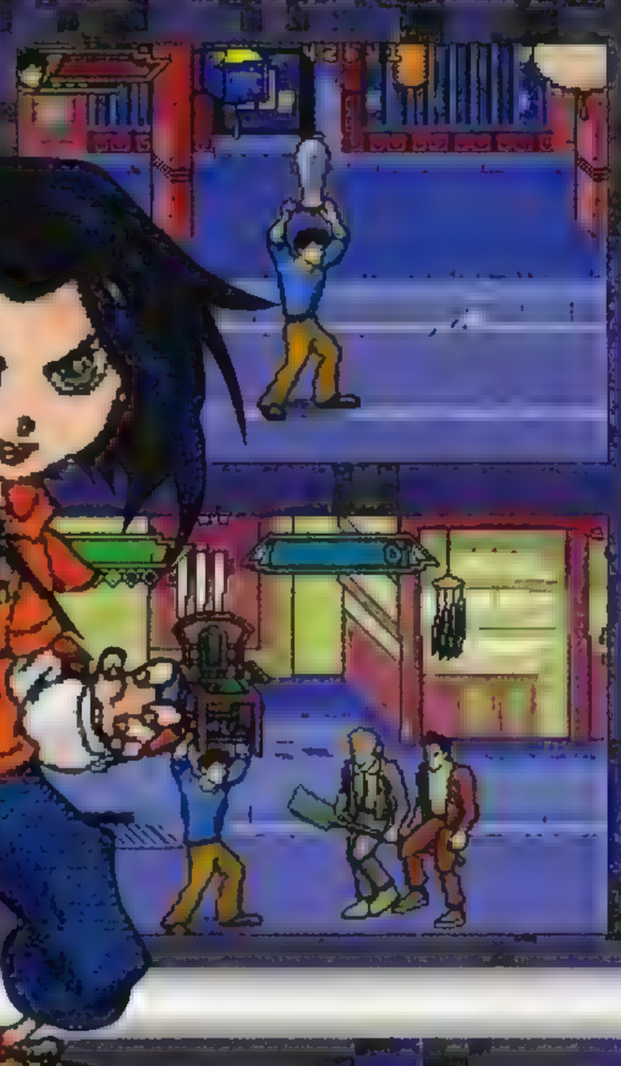
Join Jackie Chan in fighting against the evil Dark Hand. He's so hard, he's even got cannons to blow 'em away with!

Jackie Chan Adventures

Everyone's favourite action star makes his small screen debut - get ready to kick some Chan!

Jackie Chan has always been a very animated actor, but recently he has become really two dimensional by starring in his own cartoon series *Jackie Chan Adventures*, which is now brawling its way onto the Game Boy Advance. But can Chan cut it with the big boys, or will he get slapped down?



Can Chan

The story finds our boy Chan searching for a number of magic scrolls, which will help him destroy the evil Dark Hand organisation that is attempting to take over the world. By acquiring these scrolls, the already athletic Chan can perfect loads of new fighting moves, which you can use to kick oriental butt!

Chan-el No.5

Gameplay resembles classic side-scrolling fighting titles such as *Streets Of Rage* and once you start playing, you'll be hooked on the classic arcade-style action. Sure there is nothing really original here, nor does the action throughout the game vary dramatically, but *Jackie Chan Adventures* is still lots of fun. Interactive scenery finds you attacking foe with vases, umbrellas and wood and so only the strongest fighters will survive. This is certainly worth grappling for!

Chan's The Man!

For those who don't recognise that little pixellated fella, let us fill you in... Jackie Chan was unfairly thought of as the poor man's Bruce Lee until he achieved incredible Hollywood success and became a massive box office draw. *Rush Hour* and its sequel are two of the biggest action movies of recent years and their success brought Chan the ultimate accolade – his own animated show.

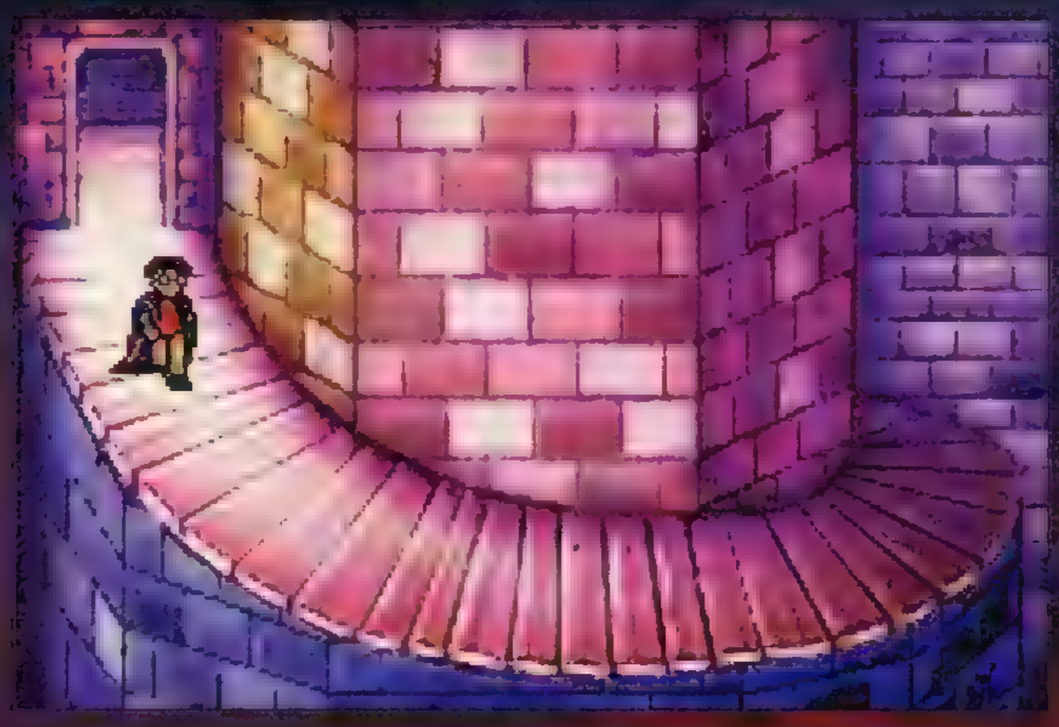
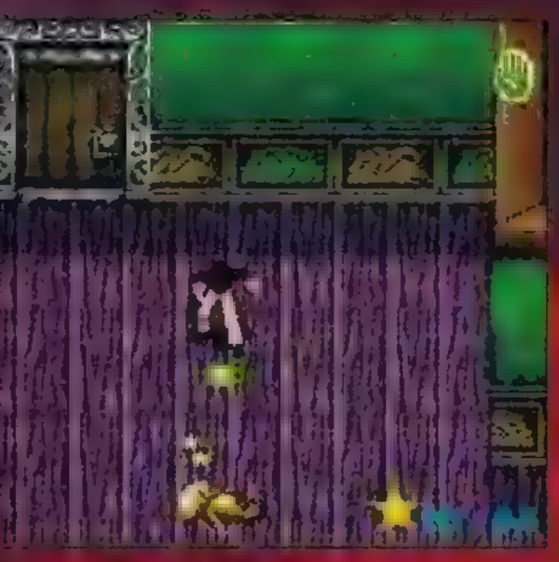
Harry Potter™ And The Philosopher's Stone

The bespectacled apprentice has cast his spell over the Muggle world, but will Hogwarts' brightest student shine on the GBA?



Don't go down there alone Harry – that can't be safe!



Unless you've had your head stuck in a cauldron for the last few years, Harry Potter™ is very probably a part of your life. The brainchild of acclaimed author J K Rowling, the young wizard so far has four fantastic books to his name, plus a very, VERY successful film, and now a whole four games, one of which is this very disappointing RPG for the GBA...

Lumos!

Based closely on the story of the first novel, *The Philosopher's Stone* allows players to step into the young hero's shoes, don his robes and enrol in the first year at Hogwarts. The objective, not surprisingly, is to reach the end of the first year, three terms on, and defeat (whisper it) You-Know-Who. Players must learn crucial spells and perform a succession of mini-challenges (29 in total) to advance through the game, ranging from negotiating the Forbidden Forest to collecting potions for Snape, exploring Hogwarts after dark, chasing down nasty-piece-of-work Malfoy to collect Neville Longbottom's Remembrall and engaging in a fast-paced, top-down game of Quidditch.

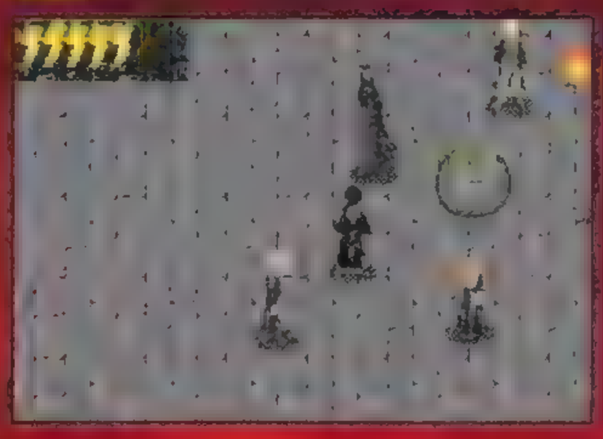
Happy As Harry

Along the way, over twenty (wow – twenty?) familiar characters will pop up to help or hinder Harry, and Potter devotees will certainly find that it remains faithful to the book. Hogwarts itself is impressively expansive too, despite the fact that there are no secrets here. You simply have to do what you're told. Which is pretty much what you did on the last level.

Tiny tots on the hunt for a challenge may find plenty to get their teeth into, as the various objectives are often irritatingly tough... (try avoiding prefects in the dark on an already-dim GBA screen!) Also, the required tasks can get disturbingly repetitive – even the most studious apprentice may be disheartened at the prospect of pushing around blocks, stunning goblins or casting spells on bushes when they have do so again and again!

This isn't going to stop Harry's followers from enjoying what's on offer, though, and with a bit of Potter-esque perseverance, they'll be well on their way to beating Voldemort (oops, sorry!) making this a predictable hit, no matter what the quality of the gameplay.

Karen



Every fairy has something dull to say when you release them.

Full House!

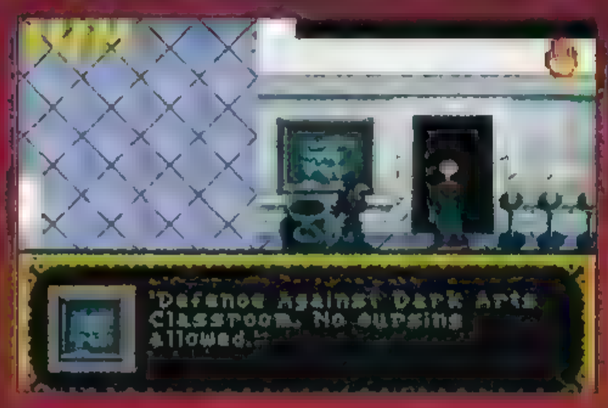
As you progress through your year at Hogwarts, you will earn housepoints for Harry's school house, Gryfindor. Points are awarded for successfully completing tasks, learning spells and so on, but can also be taken away for failure or general naughtiness. Try casting a spell on a teacher, for example, and not only will you be in for a serious telling-off, but you'll also let down your house chums by losing them points. Ron and Hermione will not be pleased...

Harry Potter And The Philosopher's Stone

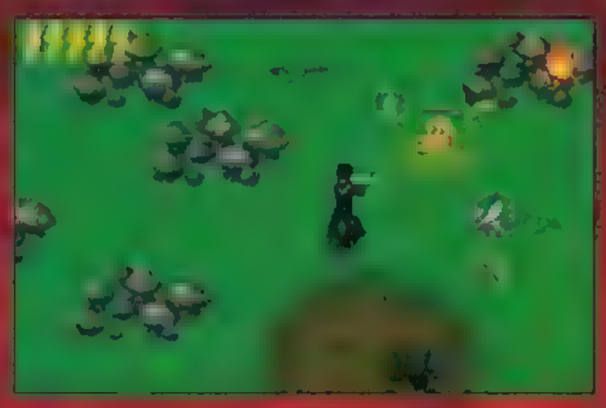
"The Philosopher's Stone allows players to step into the young hero's shoes, don his robes and enrol in the first year at Hogwarts!"

Chocaholic!

Throughout the game, players will come across a range of goodies which will help them out, including various flavours of Bertie Bott's Every Flavour Beans, from spinach to strawberry. Perhaps the most exciting pick-ups, though, are Chocolate Frogs – grab one of these and you're in for a treat, as you'll have gained yourself a famous Witches and Wizards card. You can then check out just which esteemed figure from the magical world you've collected in your Folio Magi – and when you've got the lot, there's a very special surprise in store...



Snape has Harry performing all manner of rotten tasks, the fiend.



The gardens are littered with poisonous mushrooms... watch out!

Spooky portrait – and is it a man or a woman?

Hogwarts is a big old place – little wizards could easily get lost!

In my opinion...

Potter's been potted!

Playing Game Boy Harry's made me extremely disappointed – but that's a masterpiece compared to this weak, annoying waste of money. The game's plot is all over the place – no Diagon Alley, no interesting twists, just a series of eye-meltingly dull mazes with boring switches to press, alleviated only by the challenge of pressing a series of buttons quite fast, or boring yourself to death in the aimless, shameless mess they call Quidditch. The [illegible] nonetheless, but it's still a badly designed no brainer. **Jem**

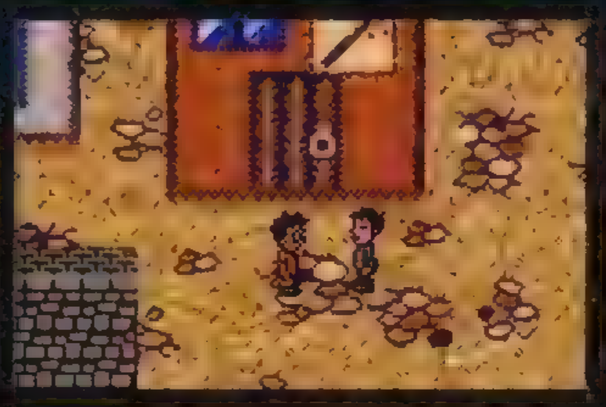
Harry Potter™ And The Philosopher's Stone

There's this kid, you see, with a lightening scar on his head and... oh, you've heard it?



Harry Potter... he's the best thing since bread. Sliced bread was better though.

Let's be honest, for the vast majority of you, reviewing any Harry Potter™ product is about as pointless as publishing a book entitled *How To Breath*. But you've got to be warned, before it's too late: this game is a massive annoyance. We already warned you that it was basically just a complete *Pokémon* rip-off, but it's actually more annoying than any Pokémon game, and at least they had a few secrets hidden away.

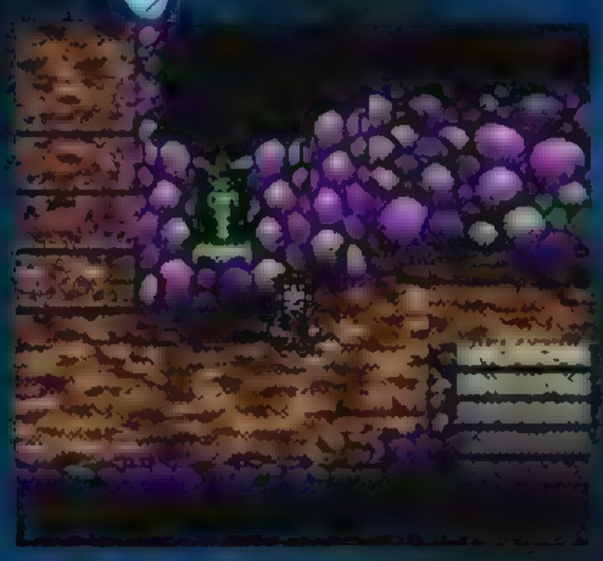
It's A Kinda Magic

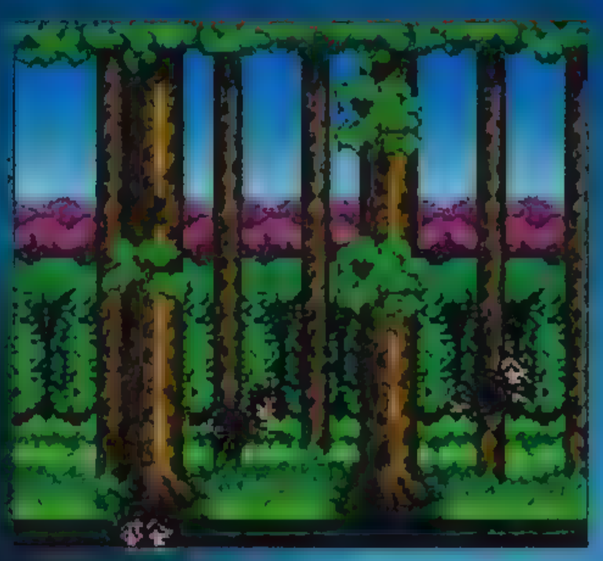
The problem with the GBC version of Harry's adventures is that they've aped the Pokémon games while keeping the strict plot of the book, which means you don't have half the freedom to explore or plan strategies like you had in Johto. Instead of collecting monsters with different moves, Harry simply plods around Hogwarts slowly picking up new spells to use in battles against rats, bats and the like, thus collecting experience and becoming a stronger wizard. They've even half-inched the whole Elite Four concept for the end, thanks to the long drawn-out final battle with You-Know-Who. It gets extremely difficult, as the challenges are vague and you often end up facing an adversary without any chance to go and collect much-needed bonuses (imagine facing the Elite Four without a few potions) or having no idea where you are, thanks to the darkened blocky graphics?! Can you then explain to us how we just completed the game in 13 hours without hardly a break?

Potter-Chu!

They've gone and done it again! For all its hundreds of massive faults, this game is inexplicably addictive! Add to that good sound, link-up Famous Witches & Wizard card swapping and plenty of save slots and you've got a flipping winner. And like we said earlier, you'll only go and buy it anyway, won't you?

Jem





In my opinion...

Harry who? Sorry, never heard of him.

It seems that very few people haven't heard of Mr Potter. You can buy Harry mugs, toys, beds and even glasses, and the latest offering is videogames. But remember kids, just because it's got Harry Potter™ on the tin doesn't mean it's any good! This is no more than an average adventure, with nice sound and link-up. Yet, this game is being sold on a name, a brand, as opposed to great gameplay. It's capitalism at its worst. DON'T GET SUCKED IN KIDS!

Dear Santa, for Christmas I want a purple pressie with a yellow bow...

Santa Claus Junior

You'd better watch out, you'd better not cry...

It's the season of peas on earth and goodwill to all personkind, so it would be totally scroogey to dismiss this colourful little adventure as a quick cash-in platform clone. Okay, so it's not one to play all year round, but there's no denying it's a rather fun little seasonal romp.

Ho, Ho, Ho!

You play little Saint Nick in the title, destined to take over Santa's usual duties when the poor old whiskered one is kidnapped (along with his reindeer!) by an evil witch with an obvious dislike for Eat Me dates and tinsel. Slipping on Father Christmas' oversized coat, you venture through over 64 highly detailed, seasonal levels to find the troubled Santa and defeat the nasty, spoil-sport witch. The graphics and sound are both fun, and although not one single inch of each level would win any awards for originality, there's no denying that this will make the perfect Christmas present for platform fans of all ages.

Oh, Oh, Oh?

There are plenty of perilous (but gorgeous looking) levels and enough hidden bonuses and options to replay. Due to the yuletide theme, it's not a long play, but there's no doubt your little face will light up. Even if you're 34. Merry Christmas!

This time next year.

Karen

Dear Old Father Christmas

Anyone who says that Father Christmas doesn't exist is a fool and a liar, and you can tell them so from me. In 3rd Century Turkey, the Christian martyr Saint Nicholas was moved by the poverty of an old man in Constantinople who dressed up in red, grew a white beard and flew around on a reindeer-drawn sleigh. For such outlandish behaviour he was sentenced to be burnt at the stake, but bought his life with an orange in a sock. For the last two thousand years he has been a recluse 394 days of the year, keeping himself alive on mince pies and sherry before making his celebrated international deliveries on 24 December. Contrary to popular belief, however, he is not magic, and finds out whether children are bad or good via an extremely complicated collection of mini-cameras and phone-taps.

Joust, *Defender*, *Robotron 2084* *Sinistar* – four titles that mean nothing to anyone born in the last fifteen years or so. Never mind, there must be plenty of older gamers out there who are desperate for a bit of microchip nostalgia, or else why would Midway have put this collection together?

Mum, Can I Have A Go?

We're not here to rubbish the games of the past, and there's no denying that game playability doesn't really age, but this is still a depressingly slack package. *Joust* and *Defender* were released in exactly the same format for the GBC a couple of years back and, considering the GBA's capabilities, you'd expect a hell of a lot more for your hard-earned cash than just two more titles. And where are the link-up options? Most classic arcade games thrived on two-player action, and at least one of these titles could have been adapted accordingly. What is more, you could probably have fitted another six games onto this cartridge and still have had room left for a few sound options.

As tall as a building, as mighty as a god... as addictive as a cup of tea.

The asphalt-chewing antics of George, Lizzie and Ralph should arguably have never left the world of the 20p-a-throw arcade original. This time they've been thrown in to bolster a reasonably entertaining *Tetris*-style puzzler.

Lobster Lobster!

Rampage Puzzle Attack has many things going for it: a whole new set of monsters to free by completing puzzles, superb graphics, a few laughs and even a two-player link-up option, which is very admirable. Yet, somehow it still makes you lose the will to live, even on a short play. The password system is truly awful and the actual puzzle element is pretty much a complete cross between *Tetris* and *Pokémon Puzzle League*, as you drop coloured blocks and bonding blocks to clear a path for the monsters to escape. We were actually pleasantly surprised...

PET Talks

Here's the deal. *MegaMan Battle Network* is set in the future, where the Internet is a way of life. Everything connects up to it and everything relies on it, which leaves society with a weakness. An evil corporation has introduced devastating viruses into the system in an attempt to control the world.

It just so happens that school kid Lan is going to be the one person who can save us all, by way of the network battles. Everyone has a PET (PErsonal Terminal). If you don't have one, you can't get onto the Net. Lan's PET is MegaMan, and by hooking MegaMan up to the Net, you can pit him against the micro-viruses – and this is the main part of the game.

Megadopolistically Good!

The last thing that GBA owners need right now is an RPG, but *MBN* sucks you right in from the word go. Your first couple of network battles will be simple affairs, but soon enough, you'll be pounding your enemies with flame attacks, giant swords and machine guns. A fantastic little game that more than makes up for the fact that it isn't in the traditional *MegaMan* style. Still, it would've been nice...

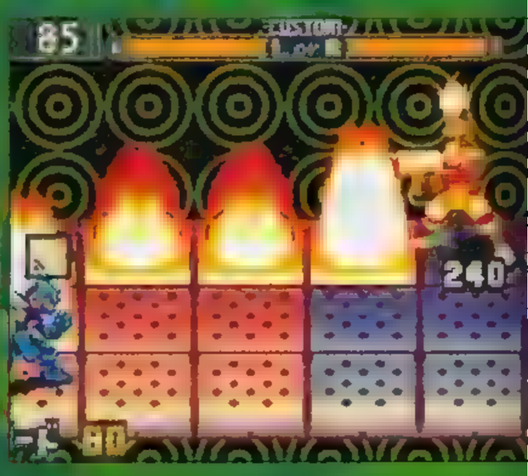
Giant Tony

In my opinion...

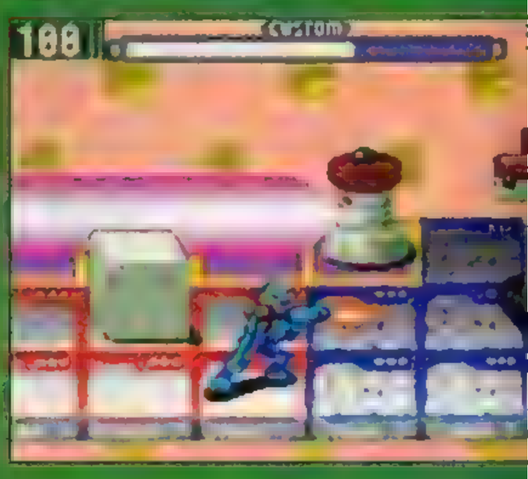
MegaMan's diddy, but he's as hard as nails!

I was a bit miffed when I learnt that *MBN* would be an RPG – like I haven't got enough to be getting on with (*Zelda*, *Breath Of Fire*, *Golden Sun*)! Still, it's different enough to hold my interest, and being able to combine chips to form super attacks is really cool.

Russ



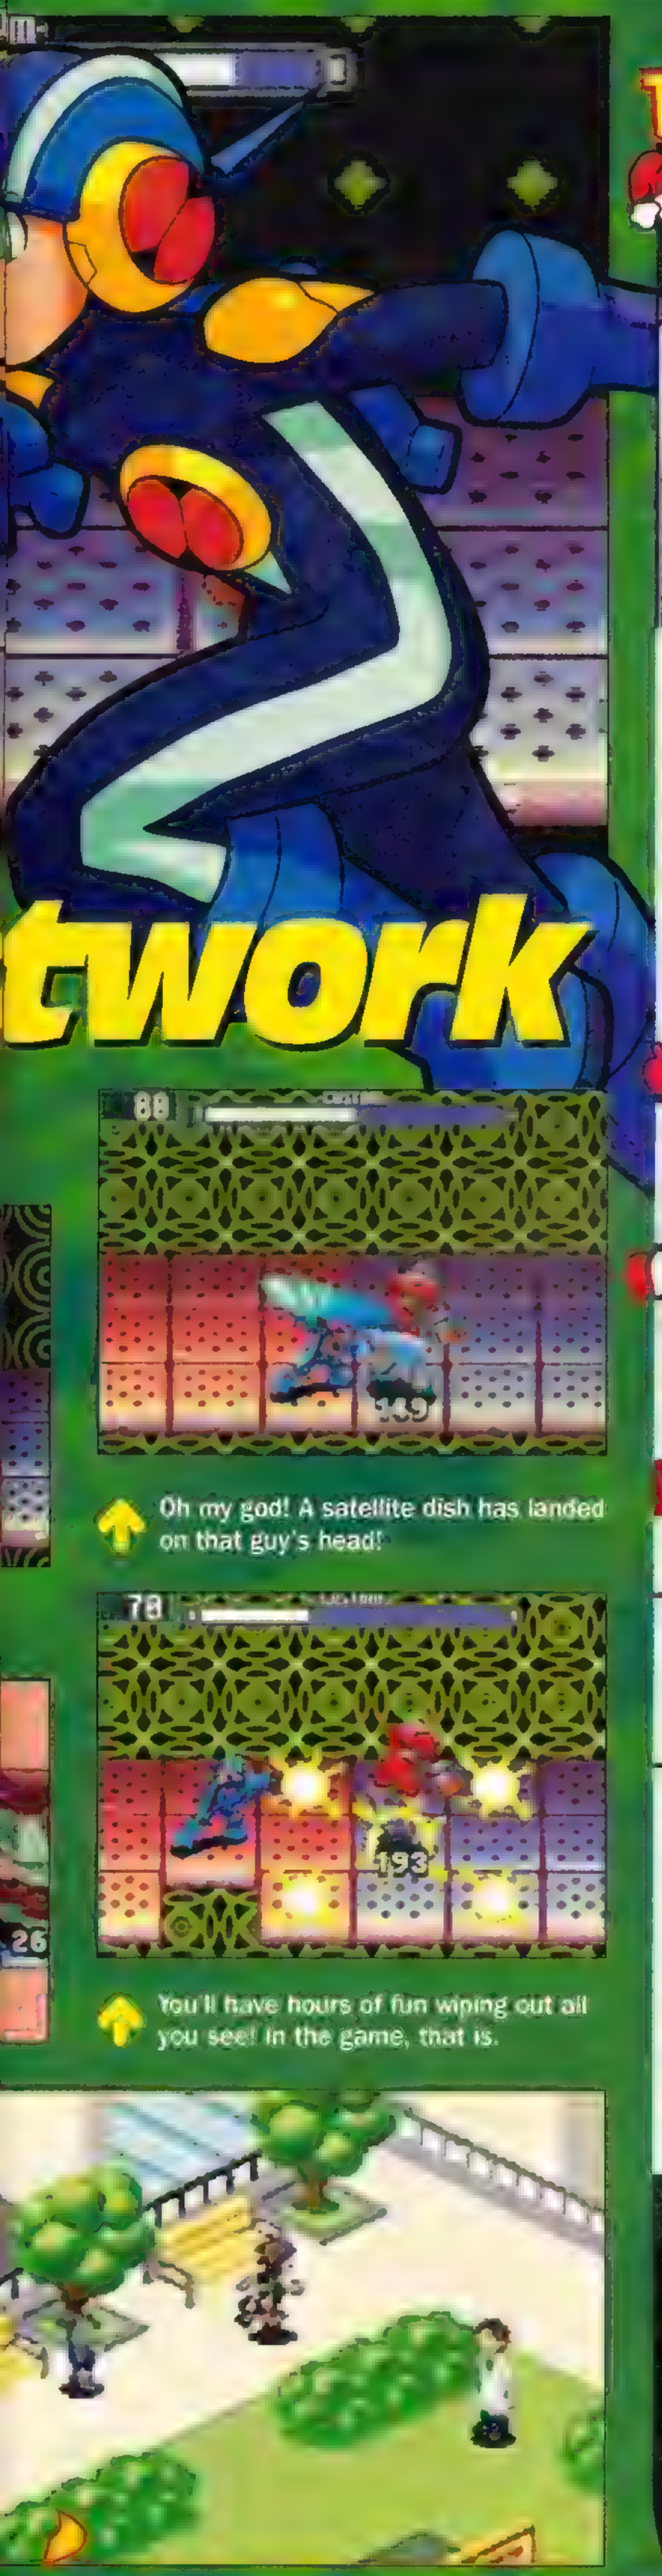
Don't ask why Megaman is fighting a liquorice allsort.



Chip Off The Old Block

The game starts at school, where Lan learns how to battle on the Net. This is the RPG part of the game, where Lan can subsequently explore the town, looking for clues on how to defeat the evil corporation. When he finds a hotspot, he can plug in his MegaMan.

You'll then go into MegaMan's world, where you can choose a number of weapons (in the form of chip add-ons) with which to take on the enemy. These range from standard guns, to swords, to awesome elemental attacks. You can also steal weapons from your enemies to use against them.



twork

Oh my god! A satellite dish has landed on that guy's head!

You'll have hours of fun wiping out all you see! In the game, that is.

Has that man nothing better to do than stand in the park all day?

MBN is quite an original take on the RPG theme, but *Zelda* is the best.

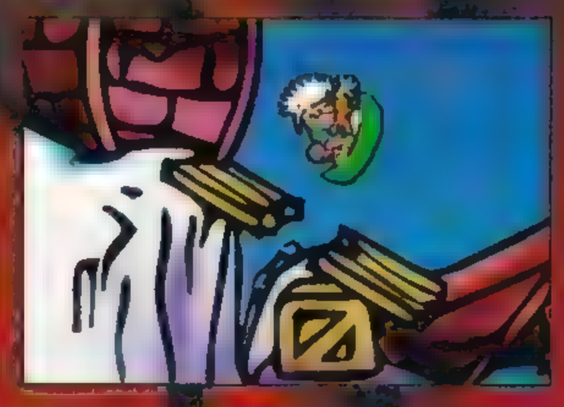
"A refreshingly different RPG, which stands out amongst the crowd."

If you land in the gunk, you'll come to a sticky end!

You can pull off all kinds of crazy stunts. Er, Gnarly.



No Rules Get Phat

Rules are made to be broken, but is the hero of this game a loveable rogue or a rebel without a cause?

What is it with aliens? It seems like they can't go a month without attempting to invade our beloved planet Earth. Anyway, that's exactly what has happened in *No Rules Get Phat*, yep, another alien invasion. Unfortunately for the bug-eyed extra-terrestrials, they've pick the wrong guy to mess with this time. You control the streetwise One Eye Jack, who's a bit miffed to find his favourite TV show interrupted by the aliens' broadcast. So, equipped with just a skateboard and his trusty catapult, he sets off to kick some butt.

Skate Or Die

Gameplay mixes together traditional platform action and some extreme sporting shenanigans. As you make your way through the colourful stages you must leap from ledge to ledge, pull off crazy stunts and take out any enemies you encounter with your trusty catapult. All of this takes place to the accompaniment of some incredibly funky tunes. It's all good fun for a while, but it doesn't quite succeed as either a skateboarding game or a platformer. If you're a skate fan go for the top-notch *Tony Hawk's Pro Skater 2*. If platforming action is your bag then grab hold of a copy of *Super Mario Advance*. Nuff said.

Shaun Palmer's Pro Snowboarding

Put on your thermals, grab your snowboard and get ready to take to the piste with pro snowboarder Shaun Palmer.

Activision is well known for its extreme sports games and *Shaun Palmer's Pro Snowboarding* is another PlayStation classic converted to fit in the palm of your hand. The graphics are bright and clear and the courses are littered with ramps and rails for performing tricks. The game runs on a similar engine to *Tony Hawk's Pro Skater 2* and the similarities between the two games are incredible.

Challenge Of A Lifetime

Each course has a number of challenges for you to complete, including getting high scores and collecting the letters S H R E D. There are four different riders to choose from and they can each perform special tricks and grinds to score extra points. In addition to the challenge course, there are also two other events for you to compete in, a competition and also a half-pipe trick fest for additional sponsors. There is so much action squeezed onto this little cart.

Top Of The World

The game is indeed impressive with great sound, loads of tricks and a very smooth running game engine. The downhill slopes are packed with obstacles and there are several different types of challenge. If you are a snowboarding fan or enjoy playing extreme sports games this could well be the game for you.

Russ

In my opinion...

Hey man! I'm board stupid

Although *Shaun Palmer's Pro Snowboarding* is a good game, it is not as good as *Tony Hawk's Pro Skater 2*. Travelling downhill all the time makes it easy to miss items and ramps, and also makes it a little more difficult to control. I prefer to ride a skateboard any day.

Simon

Board To Be Wild

Shaun Palmer is very well known in the snowboarding world and, like Mat Hoffman, he has his very own brand of equipment. Check out these amazing snowboards available at PalmerUSA, although the prices are a little scary.

The Nations - Land Of Legends

It's not easy being blue. Or purple...

If you found this game and started to play it without first hearing the story behind it, your brain would be forgiven for quietly retiring from your head, unable to cope. This RPG concerns a strange settlement of blue people without faces who force you, as the main faceless blue bloke, to run apparently endless errands. But why?

Well, actually, you see, there are three different nations – Pimmons, Sajikis and Amazons – who have to learn to work together to destroy a massive nasty monster who wants to use their respective homes for kindling.

National Lampoon

From that point on, the *Zelda*-type dogsbody challenges are replaced with a serious campaign to defeat this evil.

It's actually quite a good idea, apparently based on the TV series *Alien Nations*, but this game is seriously let down by the appalling controls. The errand-based puzzles and tasks take you back to the good old days of the Spectrum, but also, unfortunately, the graphics and sound take you back to the bad old days of the Spectrum.

We reckon there's a great, intelligent adventure waiting to get out of this game somewhere, if only you can get past the clumsy, irritating game design and find it.

Giant Tony

In my opinion...

Hey! Do your own dirty work!

At first this game got on my nerves a bit with all its *Zelda*-like errands. Why don't RPG characters do their own bleeding chores? However, if you can get past the most irritating password system of the year and seriously clunky sprite controls that have you barging into scenery and enemies very easily, there's a really good old-fashioned game in here.

Jem

Tut! Those pesky sheep keep running away!

That global warming must be getting worse – the sheep are purple and the shepherds have gone blue!

Watch out! Mind the earthquake-type gaps and trees – the controls will have you bumping into those!

Better To Give Than Receive?

Dear TGB,
Your magazine is the best in the galaxy. I've bought every issue since number 12 last year. Even though I'm not the most experienced Game Boy gamer, I recently bought *Perfect Dark*, which I have completed in just five days on my first go (five hours fifty minutes to be precise). I don't know if anyone has done it quicker, but it was a first for me. Apart from that, I have found that on GT Advance, on the fifth circuit track (ROUGH) there is a slip lane to the right of the starting grid. You can use this to overtake others to get closer to first position! Here's a password, on the house: XT/F@mps@tgx. By the way, should I get *Harry Potter* or *Ecks Vs Sever* for the GBA?
Jack Daley, Gloucestershire.

Dear Jack,
It's not very often that we get a letter giving something back, rather than begging us for extra information or free stuff generally. That's why you're getting a nice GBC Xploder from Blaze in return! You'll have an even merrier Christmas, though, if you buy *Ecks Vs Sever*. Despite the name, *Harry Potter* for the GBA is an awful mess, which you'll complete in half the time it took you to finish *Perfect Dark* – and it won't be a fun journey either!

Take A Breath!

Dear TGB,
I'm 11 and I've only just started reading your mag. I think it's great! My brother (who is 7) and I have collected all the Pokémon games except for *Crystal*. I wanted to say, all the Pokémon games have gradually improved – it's excellent! I've got an idea for a new Pokémon game. More Pokémon, catch all of them in one game, feed Pokémon and yourself and buy the food, be able to go to toilet and brush teeth, maybe choose Pokémon to follow you (like Pokémon Yellow), buy some clothes to change into, have a shower, more items, more activities like on the bicycle path a BMX track, a couple more casino games at the Game Corner, more attacks, more TMs/HMs, see yourself flying, have a camera to take pictures and even print them, go to the cinema and be able to play your N64 in the game and the name for it could be Pokémon White!!! Also (OH NO THERE'S AN ALSO!) if Nintendo is able to make Game Boy Advance, I think they could make a movie cartridge. Where you put in the special cartridge (like a normal Game Boy) and you can buy other mini cartridges, put them into the special cartridge and watch a movie on the Game Boy screen!
So, there's all my ideas for the Game Boy. I think I have many more, but I haven't thought of them. SEE YA!
Luke Quinlivan

Dear Luke,
Yeah, thoughts are nasty like that aren't they? Not appearing until you've thought of them.
Somewhere in the middle of that garbled stuff you seem to be suggesting a GBA add-on that will be out next year: TV Boy! There'll be no need for special cartridges though – you'll be able to run normal videos, DVDs, even an Xbox through that baby when it shows up!
As for the Pokémon innovations – you seem to simply want to live in a Pokémon game, which is a very, very scary prospect! Still, who knows what the GBA may have in store for Pikachu and pals?

Save Your Pennies!

Dear TGB,
My mate has just lent me this magazine and we all think it's really cool! It has everything I need to know for GBC and GBA. I'm hoping to get a GBA for Christmas, and a Zelda game, preferably *Oracle Of Seasons*. I've got a question for you. In Electronics Boutique there are both of the new Zelda games and a help book on sale for £63.00. Is that a good offer?
Dan Smith, Plymouth

Dear Dan,
NO, IT'S NOT! Don't even think about spending so much on a couple of games that you could probably get for £40 if you looked round hard enough... or waited for the January sales! Plus, of course, you've now got a complete guide to both games for free! That's saved you a few pennies.... which you can spend on buying this mag every month! Ha, ha!

I've always been a fan of Wario's games on the Game Boy and Game Boy Color, and the one thing you can say for sure about the latest version – fans of the originals won't get lost easily! I took £35 from my savings to get it, took it home and had finished absolutely everything before it was dark! Including collecting all the supposedly hidden CDs! And then the man at the shop wouldn't even let me swap the game!

This version of Wario's platform antics looks really nice and sounds good, but it's far too easy and they didn't give any decent link-ups or anything like that at all, which is total rubbish. And I have to say that those CDs are crappy – weird little Japanese video clips that scared my little sister and bored me to death. Don't buy this, folks or you'll regret it!

Ecks Vs Sever Walkthrough

ECKS Missions 1-4

MISSION 1

Location: Warehouse

Objectives: Locate the room with the laptop

You start out in the streets. Head towards the recessed doorway down in the far right corner. Shoot the guard and pick up the Keycard. This opens the warehouse door behind him.

You are now in the first warehouse. To your right are a couple of shipping crates and a stack of boxes. Directly ahead is another stack of boxes and a couple of barrels, behind which is an Armour pick-up. Crouch down when passing the boxes on your right otherwise the guards in the main area of the room will shoot you. Now head back towards the door you initially came through. There is a gap in the boxes between the crates that you can shoot through and pick off some of the guards – aim for the exploding barrels for maximum damage. To the right of the blue crate is a gap allowing you to creep behind the crates – follow this to the end wall, taking the opportunity along the way to pick off more guards in the central area through the gaps in the crates. At the end of this path is a grille at ground level. Crouch down and shoot this out, then crawl through the air vent, picking up some more armour. Shoot out the grille at the other end and take out the other guards, using the exploding barrels to your advantage. One of the guards has a Colt – make sure you pick this up. There should be lots of ammo to collect after you have dealt with all the enemies. Head towards the door by the blue crate on your right – but watch out for the guards hiding behind the crates though!

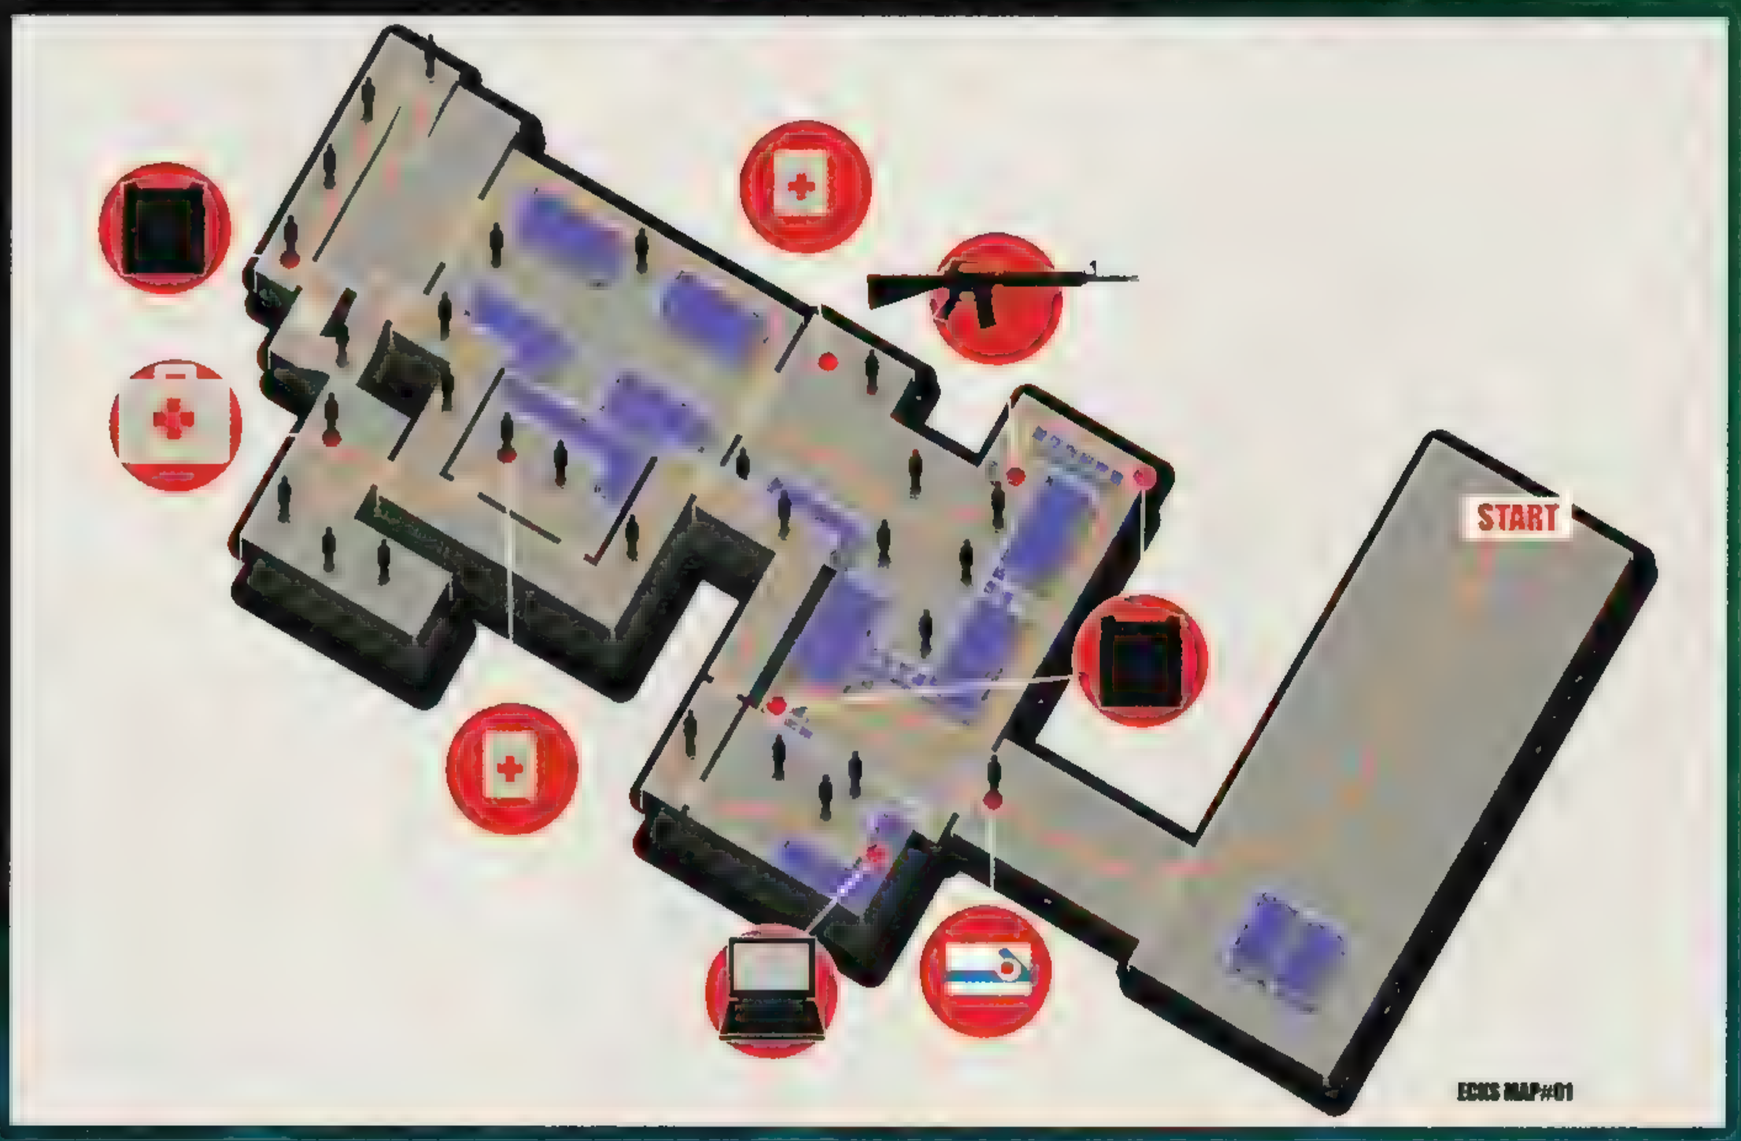
The next room contains four crates, two on either side. Shoot the guard at the far end of the room, and then creep around the back of the crates on the right hand side. There is another guard between them. Shoot him from behind and steal his colt.

Before you open the door to the next room, make sure your gun is fully loaded, and stand to the left hand side – there are a lot of guards behind the door waiting for you! Shoot out the barrels first of all. If you are taking too much damage nip to the side, let the door close and then try again. Once you've dealt with them collect the pick-ups, head up the stairs going up on the right and through the door on the left.

There is another rising staircase on your right. There are three guards waiting along this staircase and in the corridor. The corridor turns right and then left with a doorway on the right.

Shoot down the guard at the end of corridor on the left and then turn 180 degrees and enter the room on the right. Take out the three guards. Leave this room through the door you entered it and then enter thn shoot the barrels through the doorway of the room on your left. The guards here drop more ammo for your colt so be sure to pick it up.

Follow the corridor round, being careful not to fall down into the warehouse area where you originally started. At the end of the corridor is the Monitor Room, housing three Feds and the laptop. Mow them down and retrieve the Laptop to finish the level.



MISSION 2

Location: Warehouse

Objectives: The Bomb is activated. Escape within 3 minutes.

The thing to remember in this level is that speed is of the essence – taking out all the enemies isn't essential.

Go round the street area to the right: pick off the guard by the warehouse entrance door and grabbing the Pancor.

Shoot the guards at the end of the room and between the stacks of boxes on the left. The guard on the left drops some Pancor ammo that you can retrieve by shooting the barrel between the box stacks, which is blocking a gap you can crawl through.

Instead of heading through the door at the end of the room, you can turn right when you first enter and go up the small staircase, climbing through the air vent at the end of the alley. Watch out for the guard at the end though. This way you avoid the second room all together, bringing you out on top of a shelf of boxes in the third room.

If you prefer to rush through the second room there are guards hiding between the crates on the left and right.

In the third room you can either run round the crates on the left, or crawl through the gap in the shelves of boxes on the right. There are guards hiding between the crates on the other side of the stack of boxes, and another Fed guarding the door on the right.

In the next room there are two guards standing on either side of the

Ecks Vs Sever Walkthrough Missions 1-4

lift and one hiding behind the boxes in the left hand corner – deal with the two by the lift first and then take out the other.

There is a secret route in the next room that allows you to pick up the colt and avoid encountering too many enemies. Immediately upon entering the room, turn left and head towards the left hand corner – you will notice that the floor is a slightly different colour in the gap between the wall and the boxes. Stand on this and you will be raised to the top of the boxes – from here you can run along and "jump" across the stacks, picking up the colt and ammo. Jump down and head for the next door.

Make sure you've got your colt out and get blasting – the exit is at the end of this room – don't stick around to pick everyone off, just make a beeline for the door and slide under it!

MISSION 3

Location: The Streets

Objectives:
Shoot Sever dead.
Rendezvous with Mills and get Deciphering Key 1.

In this level you have to shoot Sever through the large windows. There are four points in total and at each window you have shoot her one more time than at the previous one. Upon shooting her the required number of times she will run off to the next point, the next wave of enemies will blow up the barricade that is blocking your progress.

Pick up the sniper rifle and ammo on the boxes. Peek around the corner – you should just be able to see Sever through the large window. Bring up the sight and shoot Sever once. She will run off down the corridor. Edge round and use the sniper rifle again to take out the enemies in the alley, shoot the barrel to kill the guard hiding behind the dumper.

Run through the covered alley, edge around the corner and shoot Sever twice. Be careful of the guard hiding in the covered alley to the left. There's another guard hiding behind the dumper. Use the sniper rifle to pick off the guards and feds, and make sure to grab the Pancor and armour pickups.

The next area is too narrow to use the sniper rifle effectively without taking serious damage from Sever's grenades, so after using it to take out the lurking fed switch to the pancor – strafe behind the boxes and shoot it out with her. Make sure you don't end up on the right hand side when the barricade blows.

Go through the covered alley. As you round the corner you can see the next window. Keep your distance, bring up the sniper sight and you can easily pick off Sever. There are two guards in the courtyard directly ahead, but be careful as you round the corner as there are a group of feds chucking grenades and taking potshots out of a window on the right: hold back, and take out the guards first whilst covered, then round the corner and quickly use your sniper rifle to shoot the barrels directly under the window. This should take out most of them. The rest can be picked off quite easily.

Follow the alley, taking out the feds, ensuring you pick up the Colt.

In the next open area you will see Sever crouched by Mills – shooting her will cause her to drop the deciphering key and run off down the alleyway – pick this up and follow her

MISSION 4

Location: The Streets

Objectives: Follow Sever. Don't lose her.

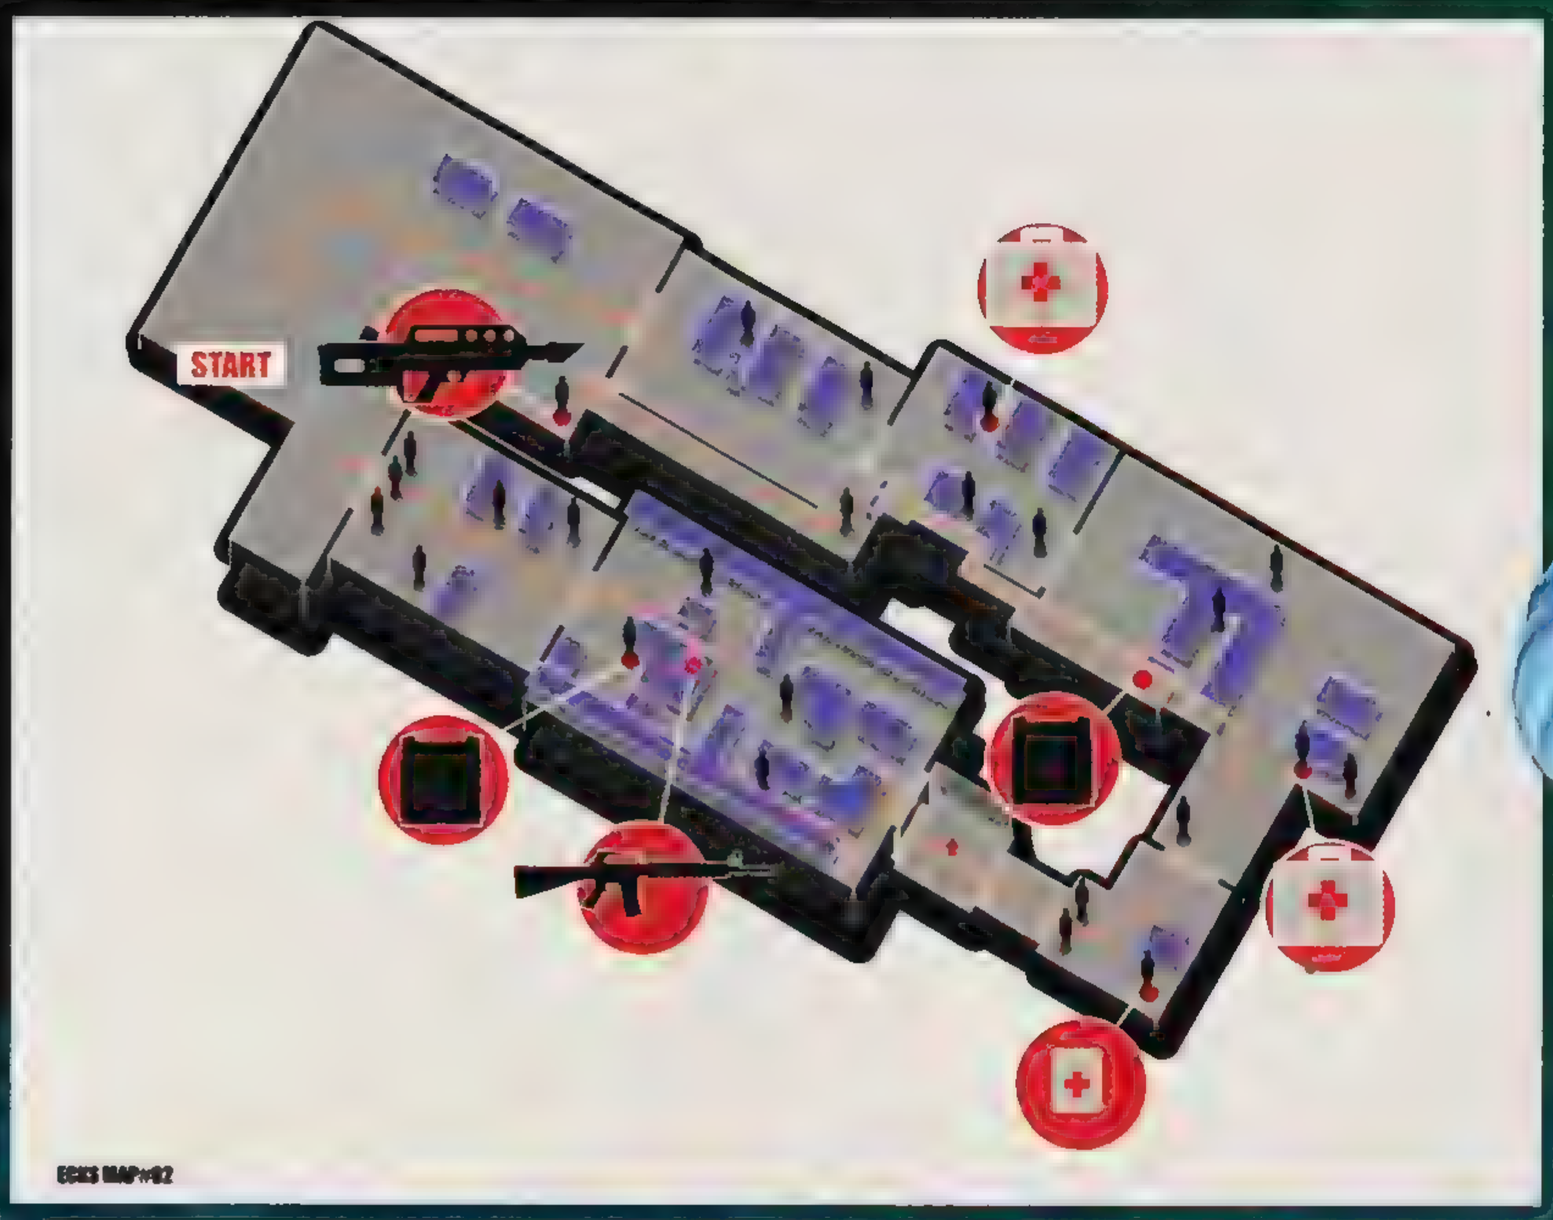
This level is divided into a series of streets and indoor sections. You start off outside with Sever right in front of you. Begin chasing her and she will make her getaway. There is a guard behind the dumpster on the left as you round the corner, and two others beyond the crates on the right. Make sure you pick up the Pancor from one of these guards.

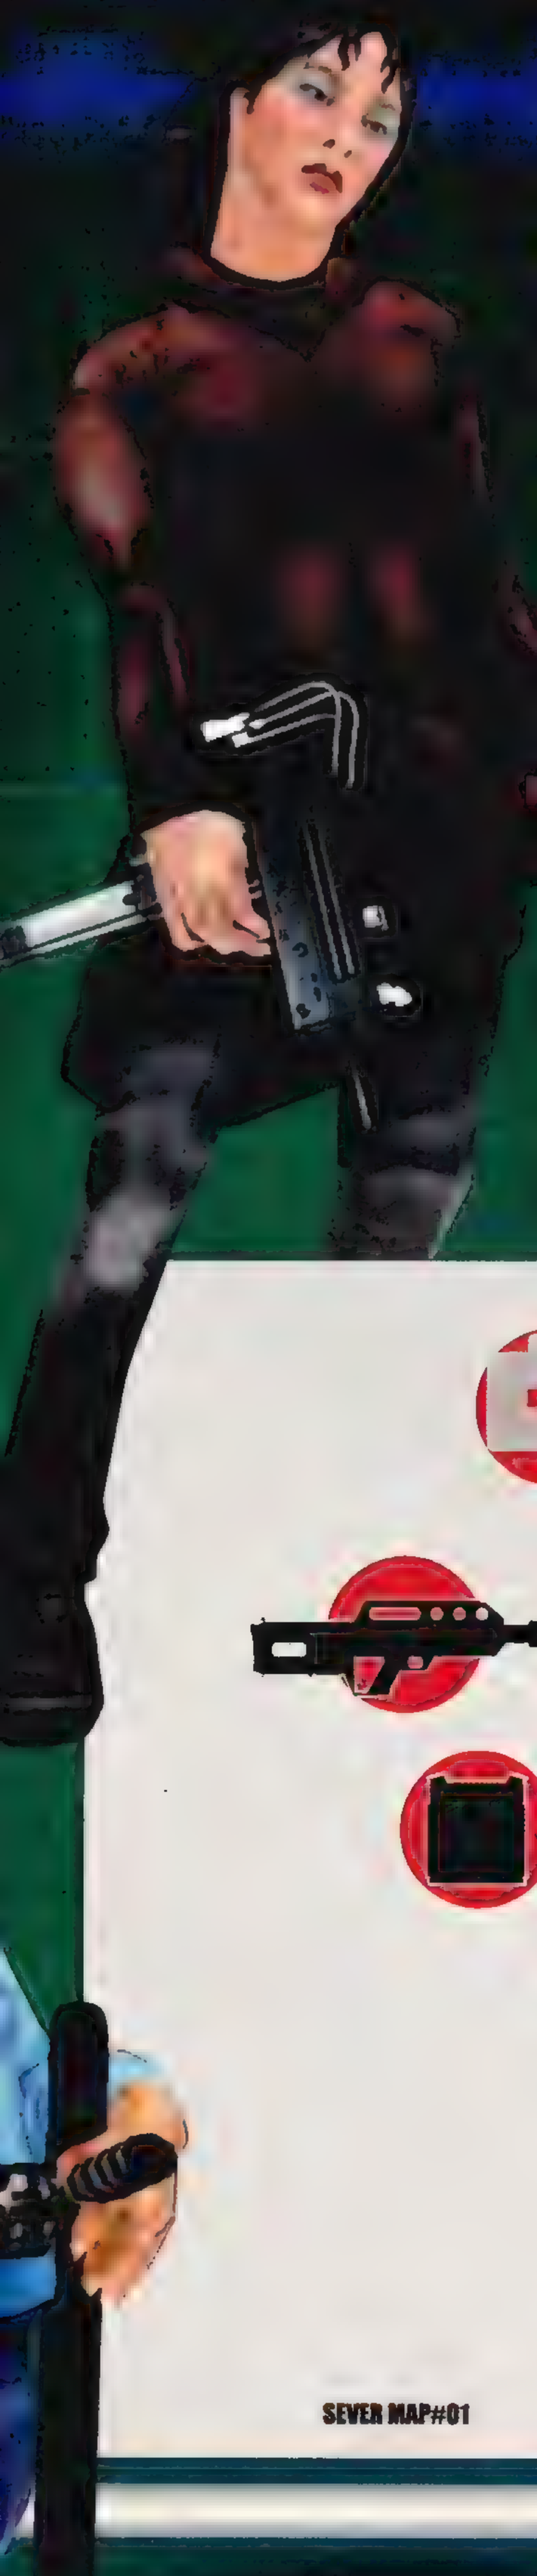
Enter the first building, dropping the guard standing in the doorway. Run up the stairs - there's another guard at the top of the flight. Enter the room at the top shooting another guard – he's holding some more ammo for your Pancor. Open the window, blast the guard on the fire escape, and make your way to the next window. Be careful when opening it, as there is another guard on the other side, this time equipped with a Colt.

Follow the stairs down and back outside, where you should catch up with Sever again. Mow down the guard standing in the corner and head for the covered alley – watch out, there's a SWAT goon hiding in there so keep your finger on the trigger. Keep you eye on Sever and follow her into the next building. You start running into FBI agents at this point so try and be a bit more precise with the shooting. Enter the next building, head up the stairs, shoot the Fed and jump through the window.

A guard is hiding around the corner on the fire escape – strafe and mow him down. This guard is holding a rather handy Ingram. Keep on shooting and you will also take out the SWAT member standing down the other end. Open the window on your right, pick off the guard in the room and collect some more Ingram ammo. Clamber back out and make your way down to the far window, picking up the Armour that the SWAT dropped.

From now on you will be encountering lots of SWAT goons so make sure you've switched to the Ingram. There are two of them directly in the room behind the window. Make your way down the stairs, dealing with the men in the corridor. Watch out for the guard hiding behind the door in the next room. Run down the corridor and catch up with Sever out side. Watch your back for the SWAT hiding in the covered alley in the right hand corner. Follow the road after Sever, picking off the SWAT. Enter the Viper Lounge to finish.





SEVER Missions 1-4

MISSION 1

Location: Warehouse

Objectives: Locate the room with the laptop

Walk down the corridor. Pick off the Guard in the first room. In the next room at the end of the corridor there are three guards, but first waste the one just to the right and grab the Pancor - use this to take out the others and pick up the armour.

The guard before the stairs has a health pack. Go down the stairs and get ready to lay into the four guards in the room at the bottom. There's some more health to pick up here. Open the warehouse door, shoot the guard at the end and then creep behind the crates to surprise the two guards waiting in ambush between the boxes. Make sure you are standing on the left of the next-door facing right so that you have a direct shot on the guard standing in the corner as soon as the door opens.

There's a secret vent just to the left of the door that holds some Pancor shells. Move through the main warehouse area using the exploding barrels to maximum advantage. Head right and climb up the pile of boxes in the corner. Turn left and enter the monitor room where three FBI agents are protecting the laptop – pick it up to finish the level.

MISSION 2

Location: Warehouse

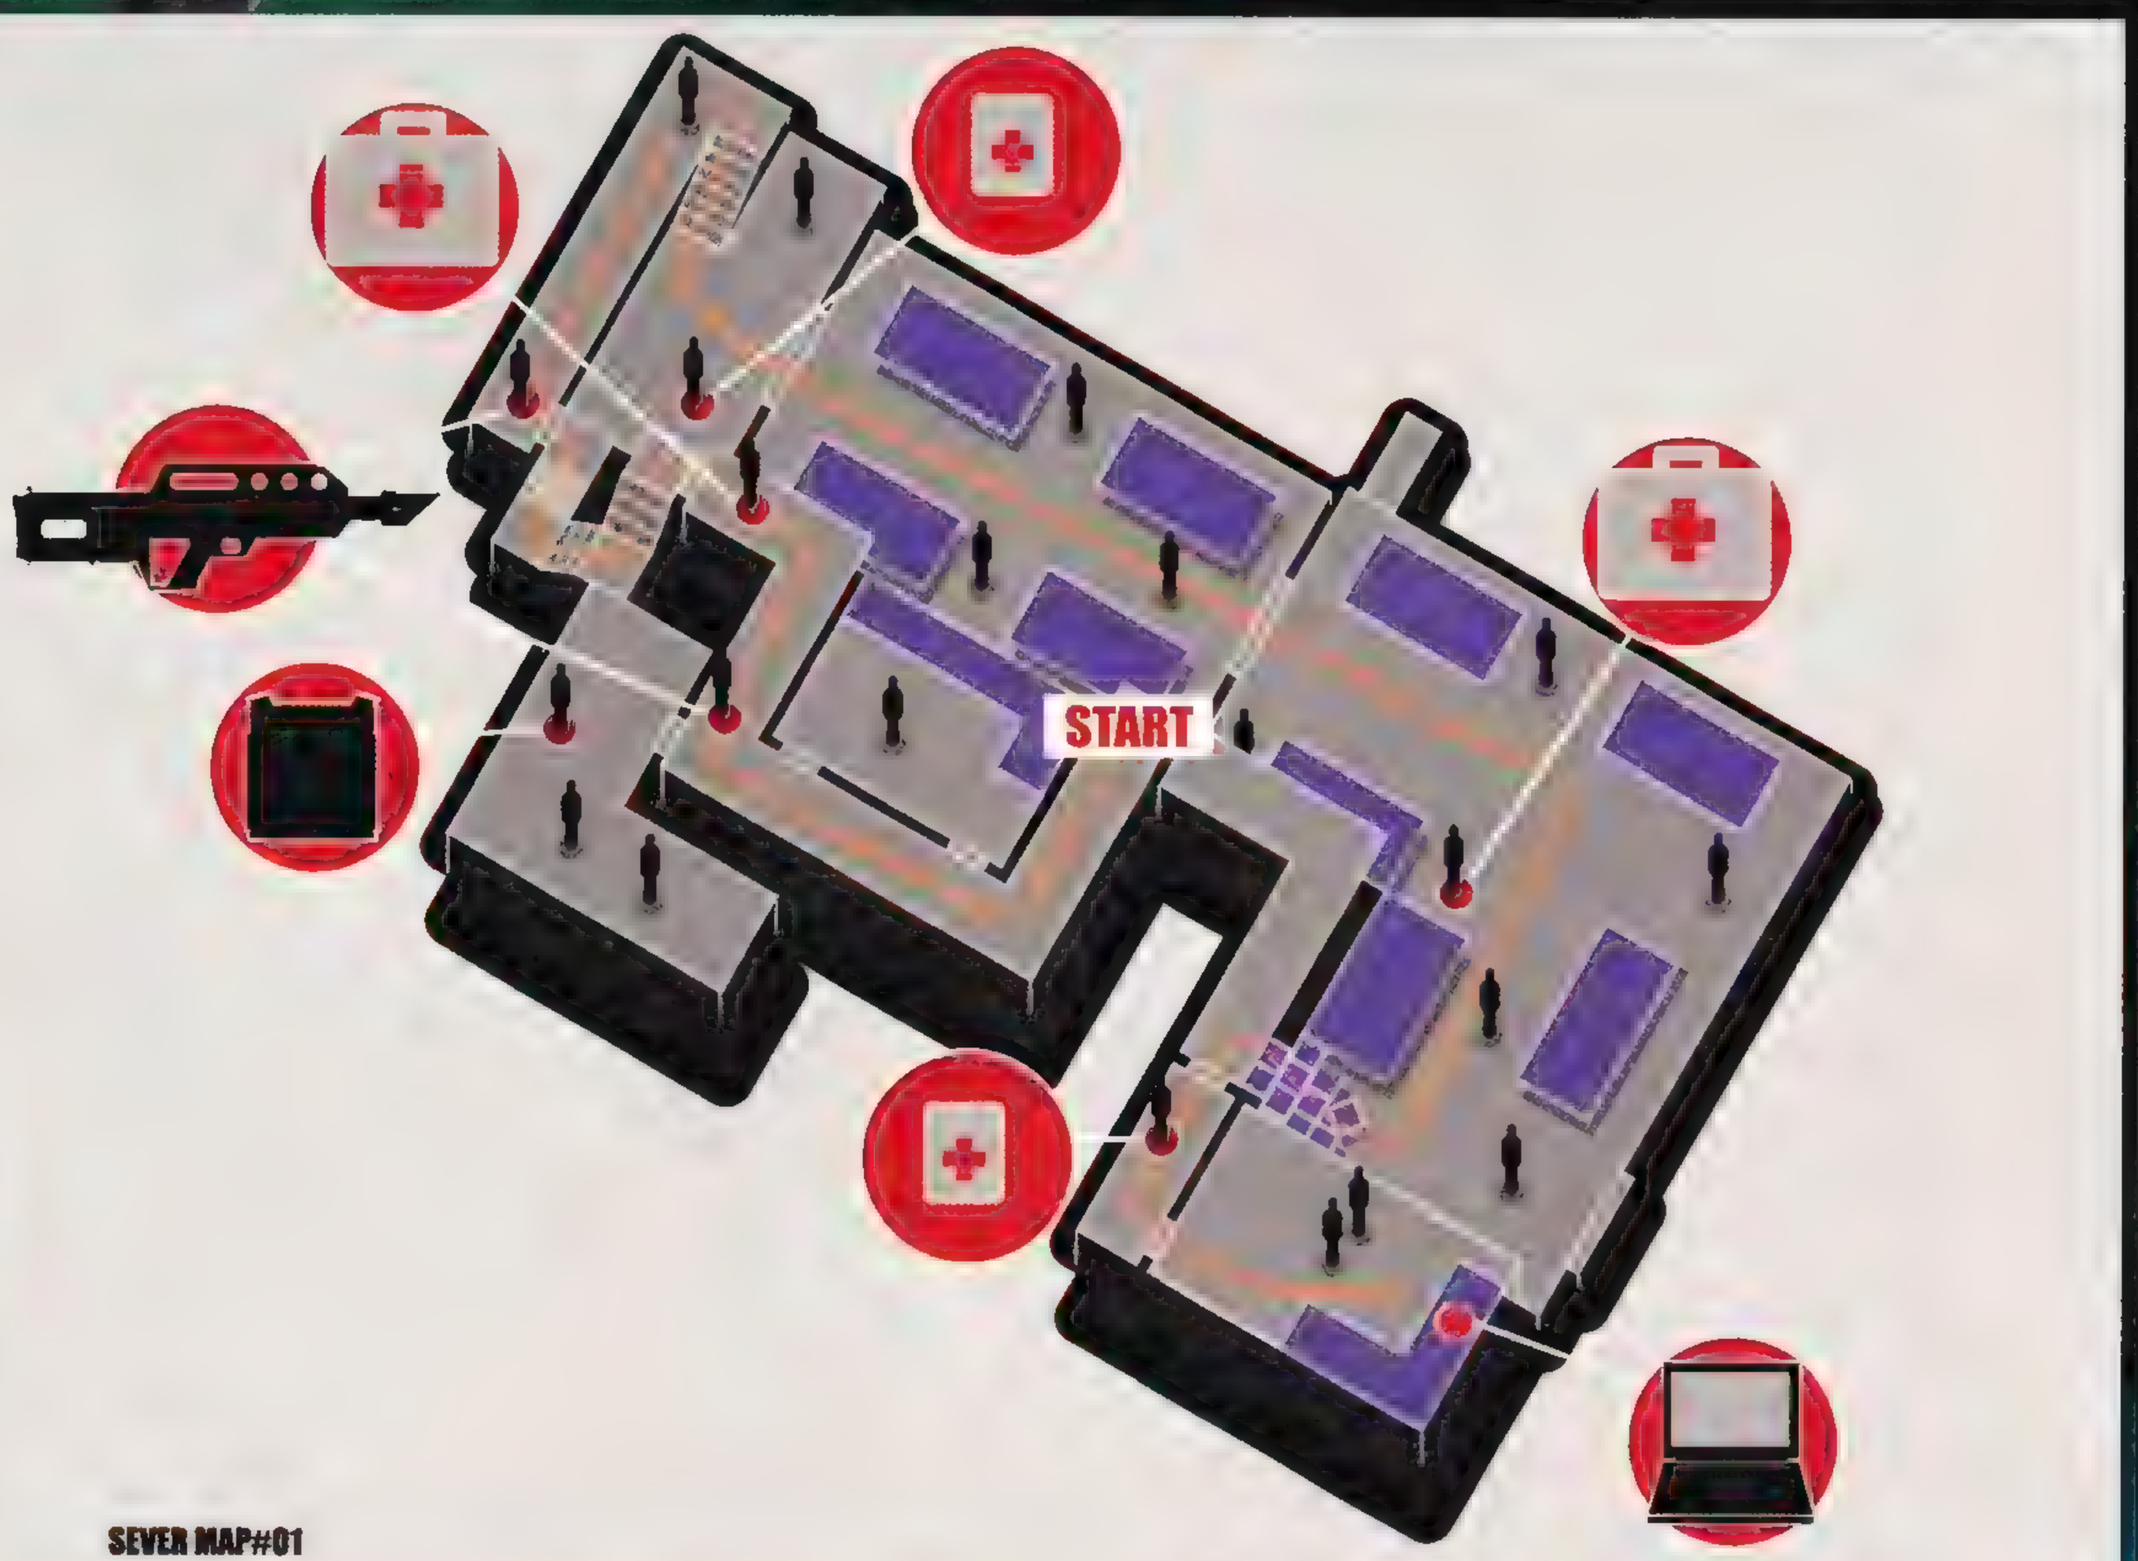
Objectives: The bomb is activated - escape within 3 minutes

Remember, speed is of the essence on this level: don't waste time needlessly trying to shoot all the enemies.

Head towards the half-open warehouse door, shooting the guard hiding behind the boxes to the left. In the first room there is a guard hiding behind each of the shipping crates. The first one on the left has a Pancor, so take him out and grab his gun. The second one on the left is holding a health pickup.

The next room is a bit of a maze – the best way to navigate it is to stay to the right until you reach the barrels in the middle blocking your path. Blow them up and head straight for the door at the far end. If you have some time to waste you could collect the Colt and ammo on top of the boxes by heading to the far right corner and standing on the light square between the boxes and the wall.

Go through the door and activate the lift. It takes a little while to come up so don't be worried if nothing seems to be happening – you should be able to hear it coming up. Watch you back for any FBI agents that you missed. Take the lift down – in the room at the



SEVER MAP#01

bottom are two guards by the door and one hiding behind the stack of boxes.

Go into the next area, creep around the crates on the right, shoot the FBI agent in the back and then make a beeline for the gap in the crates straight ahead. Pop a cap in the guard on the other side before jumping out. Notice the light square on the floor? It's another secret lift! To activate it, action the boxes opposite it and then step back. This allows you access to the vent so you can get bypass the next room. Drop of the other side; shoot the barrels at the other end, hopefully catching the FBI agent at the other end of the corridor in the blast. You needn't worry about the other enemies in this room unless you are running low on health, in which case there's a health pack up for grabs. Otherwise take the door on the left back outside.

Run round to the left, blow away the guard and FBI agent, and then dive under the open warehouse door to finish.

MISSION 3

Location: The Streets

Objectives: Locate Encrypted Disk 1. Find Mills and kill him

You start in a covered alley. Enter the building – be ready for the guard immediately on your left. Head down the corridor, making sure you pick up the armour dropped by one of the guards.

As you enter the first room, crouch down and shoot the two guards. Ecks is outside trying to snipe at you, so keep your head down until you pick up the grenades that the goons drop. Creep up to the window and chuck a grenade out – you only need to hit Ecks once to make him move on to the next window.

Carry on along the corridor, lobbing grenades around the corners to blast the waiting guards. You can pick up some armour and extra grenades in the next room, and even more grenades plus some health in the following corridor.

Be careful when entering the next room as the door is directly facing the window – Ecks will take every opportunity to destroy you. The best tactic is to try and lure the Guard and FBI agent towards the door and then throw a grenade in. There is another guard just inside the door to the left of the window: make sure you shoot him before crouching and moving towards the window so that you can start lobbing grenades out with suffering further damage. You will need to hit Ecks twice this time though.

Take the corridor through the door on the left. But watch out as you round the corner as you are in direct line of the window. There is another FBI/Guard pair in the room that can easily be dispatched with a well-placed grenade.

Tucked away through the door on the left is a cowardly FBI agent. Grenade him and grab the health pickup before chucking grenades at Ecks, now requiring three hits. Head down the corridor on the other side of the barricaded alley. In the next main room the window is directly to the right of the door so be careful when taking out the FBI agents on the far side.

Run through the last room picking off the remaining agents and then head into the courtyard where Mills is waiting. Use the Colt to assassinate him and pick up the keycard before heading out for the half open metal door.

MISSION 4

Location: The Streets

Objectives: Ecks is in pursuit. Try to evade him.

The key to this level is not to stop and take Ecks on. He's a mean mother and will kick your ass. Just stay out of his way as much as possible. This is another mission where you are better off just making a run for it and not worrying too much if you miss a few kills.

You start behind some boxes: use these cover and head for the next set on the left. As you turn the corner you will run into a guard. Put a cap in him and nick his Pancor.

The entrance to the building is around the corner and through the door on the right. Pick up the armour in the next room – you are going to need it! Move down the corridor and through the window, dropping guards where you can. Through the next window along is a guard holding a medi-kit if you're running short on health. Follow the fire escape to the left and grab the Colt of the guard through the next room.

Avoid using the Colt straight away, as you will need it to deal with the SWAT members later on. Exit the building and follow the street round to the right. Enter the door to the next building and shoot the SWAT on the left, thanking him for his Ingram as he hits the deck. Then it's through the corridors and onto the fire escape, back through the window and down more corridors. SWAT will be firing at you all along the way – do your best to ignore them and keep running. Exit the building and you're on the final straight. Follow the road around and enter the Viper Lounge to complete the mission.

Snow White And The Seven Dwarfs

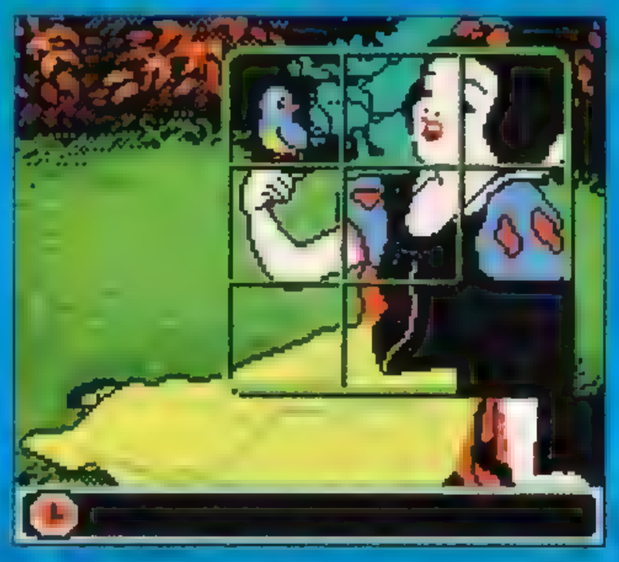
Snow White has skipped her dainty way from fairy tale to game, but will she tell a different story on the Game Boy?

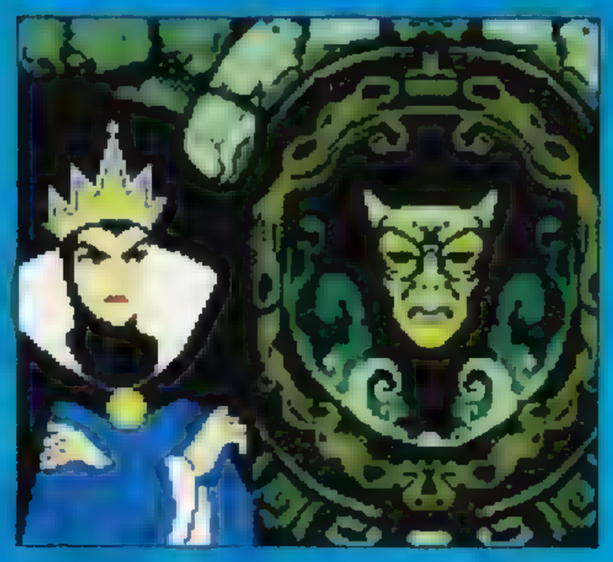
T

Hi Ho!

Got two rabbits, three to go and we'll be able to make a nice stew

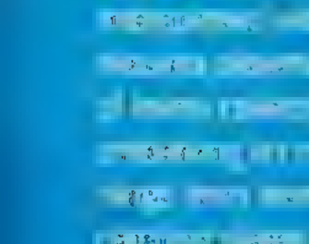
Mirror, mirror on the wall, who's the fairest of them all?





It's Off To Work They Go

Players don't just get to control the lovely Snow White – they will also be given the opportunity to take on a number of tasks as one of her vertically-challenged chums. A late platform section, for example, has you exploring underground mines collecting jewels as a wee dwarf, whilst one of the puzzle sections involves shooting at vultures as another of the seven little fellas. Ah, bless.



In my opinion...

and Sleepy. That's what I was when playing this game – half asleep. Okay, it's designed for small children, but that's not an excuse to make a game stupidly simple. They can't do complex things, but they still want fun! **Cyra**

Bewitched

- Very young children will find the game accessible and fun.
- Characters look cute and will appeal to nippers.

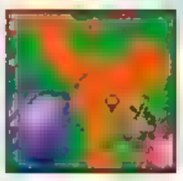
Bedraggled

- Unfortunately, there's not much to it, even for a children's game.
- The level design is, in places, unbelievably basic.

Or you could try...

Alice In Wonderland
From Nintendo

This game gives you fantastic adventuring in the weird and wonderful world of Alice.



Graphics ★★
The characters are nice, but the platform levels look pretty terrible in places.

Sound ★★★
The usual tinkly affair – it is not bad though!

Playability ★★
If you're four – great, but anyone else is in for disappointment.

Lastability ★★
Again, very wee people might find enough here to keep them coming back, but experienced gamers will be through with it in an hour!

Phalanx

Phalanx

An old-skool, sideways-scrolling shooter shoots... but can its Eighties gameplay still score in a modern world?

It's your typical Sunday for Rick Sanada – have breakfast, take the kids to church, save another planet from an invading horde of marauding aliens. Actually, that's a lie – our Rick exists solely to fly the *Phalanx* A-144 strike fighter with his genetically enhanced, 33 times faster than normal reactions.

Phalanx Symbol

So the story's not that original – that's okay, neither is the game: head left to right, destroy things, pick up increasingly massive weapons! You can carry up to four weapons at any time (switching with the R button) and turn a weapon into a meaty 'destroy-everything-in-sight' bomb. The downside is you lose the gun, so you'll have to decide between ploughing on or ditching weapons. However, the main problem with *Phalanx* is that it's pretty bland!

Pea Shooter

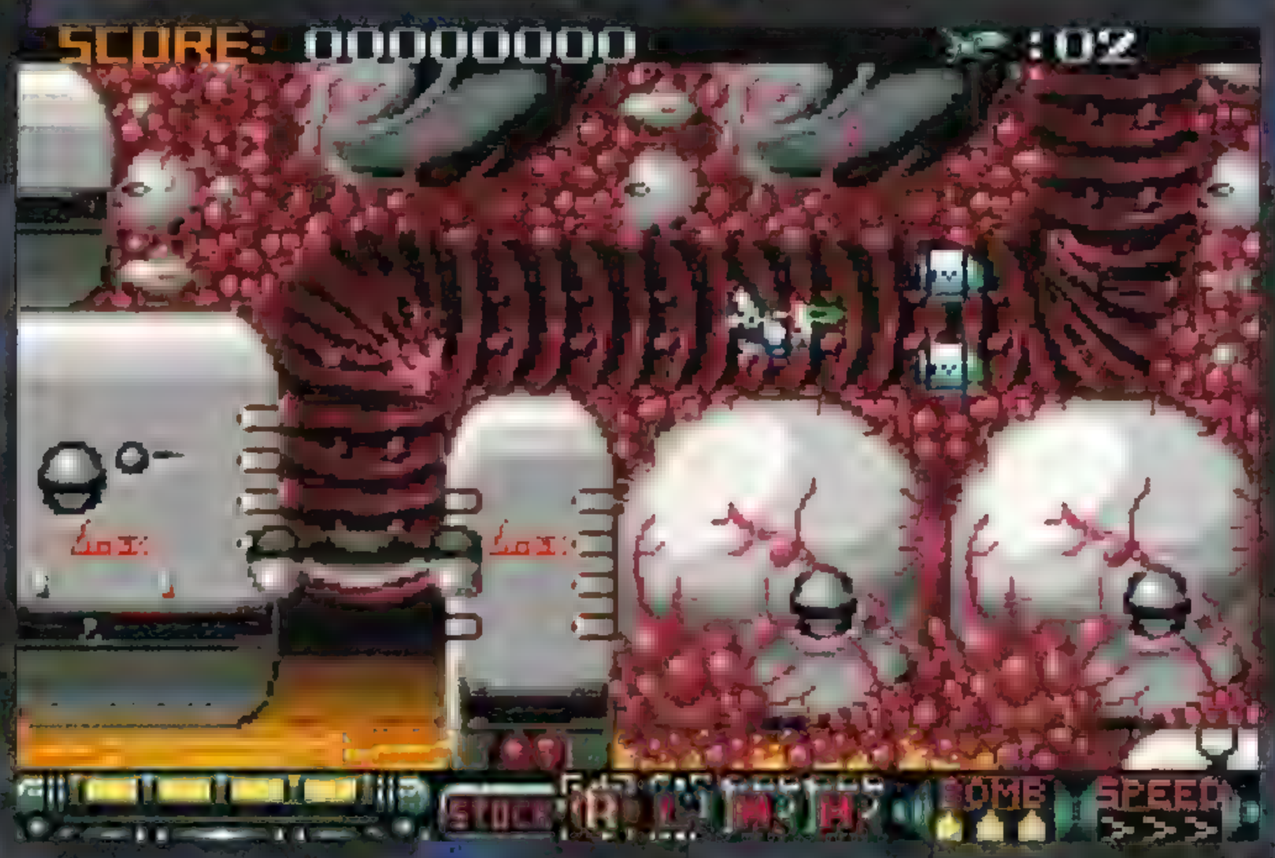
It doesn't have the addictive simplicity of *R-Type* or the Earth-shattering visuals of *Gradius*. It's one for hardcore shooter fans only!

Giant Tony

All Change

Phalanx is an odd 'un in many ways! One of which is that when you change weapon, your ship changes. Not transforms, oh no... your old ship vanishes and in a flash a totally different craft takes its place! Why? That's just the way things are in the future!

What on earth is this!? Is looks like a nuclear explosion in a brain!



Go left, go right, shoot, destroy, pick up weapons, blah, blah, blah.

In my opinion...

A blast from the past? Not really.

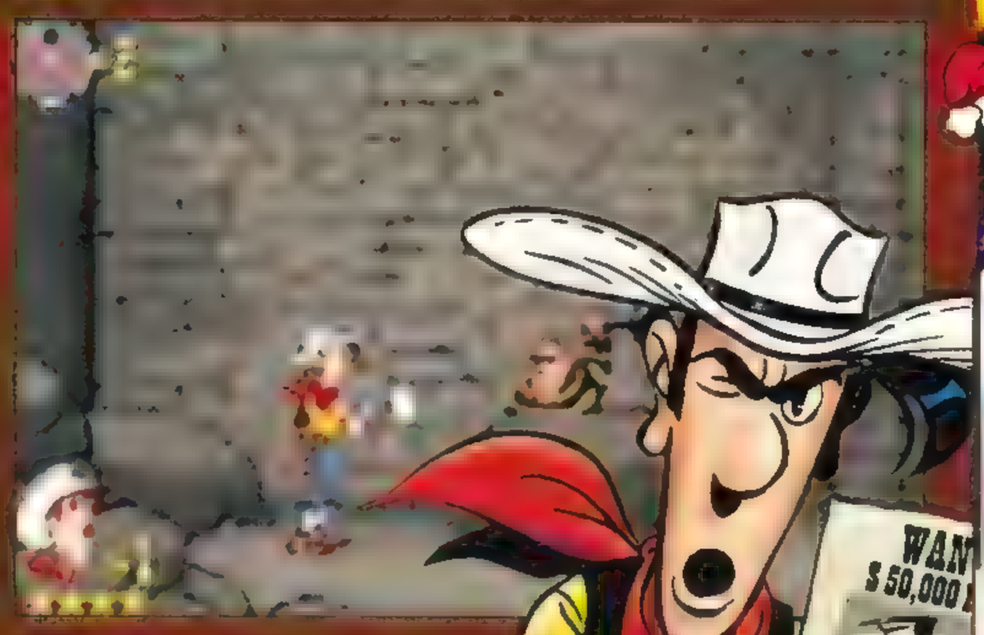
"There are so many good shooters in the world. Why bother bringing this one to the GBA?"

The graphics are really nice looking. The backgrounds look fabulous and the character animation is sweet.

The game has a very cartoony feel to it. The emphasis is more on comedy than bloodthirsty violence.



Lucky Luke: Wanted!

The dastardly Dalton brothers have been released from prison and are causing all sorts of trouble. Guess what? It's up to you, as Lucky Luke, to bring some law to the land.

Ever fancied yourself as a rootin', tootin' cowboy? Well, now you can live out all your sharp-shooting fantasies on your favourite handheld. *Lucky Luke: Wanted!* places you in the role of a hapless cowboy, who must hunt down the recently released Dalton brothers, before they create any more mayhem.

Saddle Up

The game contains a selection of different play modes, although the main bulk of the action sees Luke blasting his way through some really cool, brightly coloured Wild West environments. Unfortunately, you have only got a limited supply of ammo, so try not to waste any shots as you pick off the various bad guys that pop up throughout each stage.

Gone West

It's all good fun, but the slightly simplistic gameplay may soon leave older gamers a bit bored. Fortunately, to spice things up, there's a whole bunch of mini-games that can be played against the computer or with a friend via a two-player link-up option. There are definitely better games on the GBA, but *Lucky Luke: Wanted!* will keep younger players happy till the cows come home. This certainly isn't essential, but it's worth a look.

Giant Tony

You Lucky People

As far as cowboys are concerned, Luke isn't the sharpest shooter on the scene. However, as his name suggests he's a bit of a lucky fella and the bad guys he meets know this. So, Luke can use his reputation to his advantage. Some guys get all the luck, eh?

In my opinion...

We're going straight to the Wild West.

With its colourful cartoon graphics, *Lucky Luke* certainly looks the part. The main game is good fun and should keep you playing for many an hour. Add to this a selection of enjoyable mini-games and you've got a nice little game. It's quite simplistic, but *Lucky Luke* will make a great present for a younger relative. Yee haw! **Simon**

Donald Duck Advance

Mickey's quacking best buddy (except for the big gerbil in a hat) is regurgitated for the GBA!

Blimey. Talk about a time loop. It's really not that long since we gave *Donald Duck: Quack Attack*, for the GBC, a reasonable 84% and, to be honest, it probably deserved more. What the tricky, fast-paced platformer didn't deserve was to be usurped on its own territory by this GBA rehash.

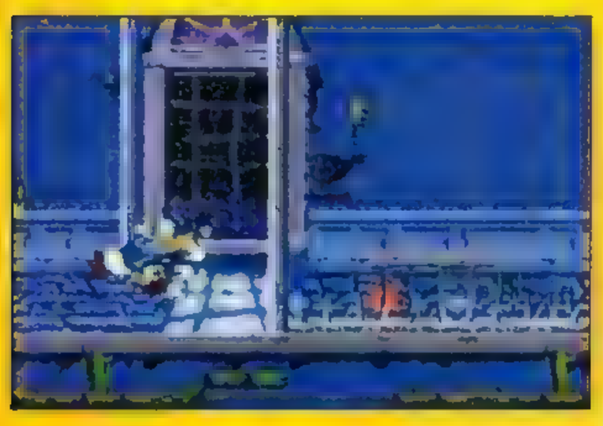
Quacking Hell!

Reworking the graphics of recent GBC games and adding the word 'Advance' to the title is a new idea that simply doesn't appeal. Okay, so *Inspector Gadget Advance* is much the same, but at least there's an attempt to tell a new story. This is exactly the same 'save-Daisy-from-a-big-dog-with-a-beard' time-travel caper that made us scream with anger and then yell for more on the good old GBC, but with added detail and a few extra bits of gameplay tagged on. For an extra tenner.

Out For A Duck

The strangest thing about the game, despite the rather yummy graphics and additional Picture Gallery Collectable Card option (which could have been in the original anyway), is that it simply doesn't play as well as the first game. It seems slower, harder to follow and decidedly lacklustre for a GBA adventure. There's a cute 3D intro, but the sound isn't great either and, quite frankly, you'd do better to get the GBC game for £15 and play it on your GBA. Didn't the designers of this game realise that was an option?

Jem



Well, at least the graphics in this game are rather quack-ing!

In my opinion...

If you don't like duck, you're rather stuck!

Jem's going over the top a little here, to be honest, because this is still a fun time-travelling romp with amazing visuals. Then again, you're really not getting much for your £35. And we're all a bit worried about the laziness of games companies redesigning and repackaging GBC games and simply adding the word 'Advance' to the title. Try something new, for duck's sake!

Cyril

HEY! HAPPY CHRISTMAS YOUSE GUYS! I've bin sitting in a bottle of rrrrum for the whole afternoon, n frankly, I'm shozzled. But I jusht 'bout 'membered to go back a decade or sho and get the lowdown on a mush better Donald Duck advensher. Those Total Bee Gee guys may be down on recycling old MegaDrive and SNES games for the GBA, but *Donald Duck: Quackshot* for SEGA's machine was a real classic, what with shootin' plungers all over the place 'n' fightin' through loads of levels n havin' lots of fun n that. Now that'd rilly make for a good Donald Advansh game. Scuse me. Must go to the toilet.

International Karate Advanced

Having appeared on eight systems before now, you'd have thought that this would be a pedigree title, but can it really survive in the modern world?

If you believe the hype, *International Karate* was the game that influenced *StreetFighter*. That may well be true, but over the past ten years, *StreetFighter* has evolved into the perfect 2D beat-'em-up, whereas *International Karate* has stayed pretty much exactly where it was.

Chop Fooey

The graphics on the characters are pretty average, but the photorealistic backdrops are very pretty. The thing is, it's just so slow and frustrating to play! Instead of simply pushing left and right to face your opponent, you have to use the shoulder buttons. Each character has exactly the same moves – I know that this is karate, but you'll get bored of sweep, roundhouse and jab within five minutes of switching the game on. As if that wasn't tedious enough, the collision detection is bad as well. Your punch/kick will look like it's hitting your enemy, but nothing will happen, even if you're virtually on top of him! I'd stay well clear of this one...

Giant Tony

In my opinion...

Everybody was Kung Fu fighting...

As a big fan of *International Karate*, I found this game top quality. The fighters are easy to see and control, plus there are a number of bonus games to help improve your all-round skills. The time has come to fight – the international way!

Russ

The collusion detection is truly awful. You might think that you are making contact with the opponent, but you won't get the points!

There are lots of different cities to play in, including London – enjoy fighting on the South Bank! Wonder if Melvyn Bragg fancies a ruck?

Wax On, Wax Off

There are a few bonus games in *International Karate Advanced* to provide you with some extra entertainment, but – most importantly – to prime your reflexes. Push Up, Down, Left and Right to block the oncoming balls of doom. Alternatively, you can always go for the Bomb game, where you must punch and kick the bombs out of your way before they explode in your face. Antz World Sportz

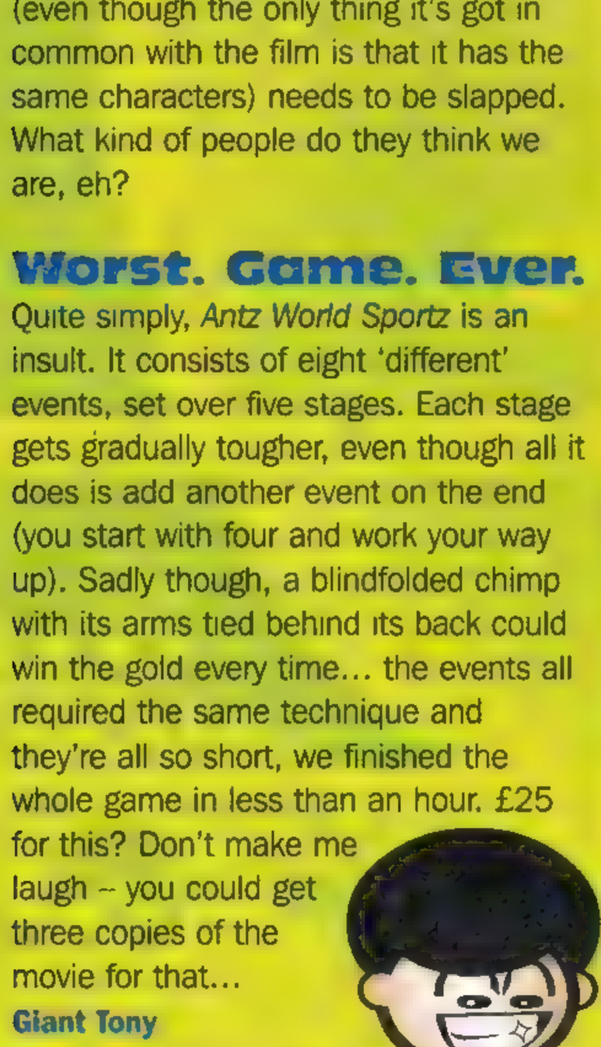
Take an old film, take out everything that makes it recognisable and then toss in some lame sports... yep, that's Antz World Sportz!

It's typical... just when we started to have faith in the Game Boy Colour again, a game like *Antz World Sportz* comes along. Whoever came up with the idea of bringing out a game based on a three-year-old movie (even though the only thing it's got in common with the film is that it has the same characters) needs to be slapped. What kind of people do they think we are, eh?

Worst. Game. Ever.

Quite simply, *Antz World Sportz* is an insult. It consists of eight 'different' events, set over five stages. Each stage gets gradually tougher, even though all it does is add another event on the end (you start with four and work your way up). Sadly though, a blindfolded chimp with its arms tied behind its back could win the gold every time... the events all required the same technique and they're all so short, we finished the whole game in less than an hour. £25 for this? Don't make me laugh – you could get three copies of the movie for that...

Giant Tony



In my opinion...

I've got ants in my pants...

I am sorry to say everything that Giant Tony says here is true... and then some more. This game is so utterly and terribly bad, words cannot describe it. It's an insult to the GBC. The design is pants, the gameplay is pants, the graphics are pants – it's all pants, pants, pants. Please, do not go out and waste your money on this sad excuse of a game.

"If you see anyone actually buying this game, point and laugh – they deserve it."

All-round sporting extraordinare, Kao takes to his snowboard to tackle some floating dough balls. It's not exciting.

There's nothing kangaroos like better than a nice raw heart.

Kao The Kangaroo

He's bouncy, trouncy, flouncy and pouncy - but is he fun, fun, fun?

Poor old Kao. This dear kangaroo hasn't fared too well on any console so far. Since his first appearance, all of his adventures have been instantly slated as unoriginal and, far worse, uninspiring. And, having played the brand-new Game Boy Advance adventure, this seems to be because the designers of the inane pugilist marsupial don't have an original idea in their heads. From the very first set of spikes to the final boss level, *Kao The Kangaroo* comprises 21 levels of platform cliches.

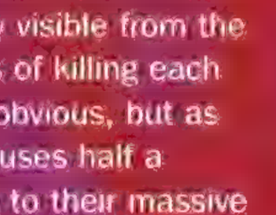
Kao Knock Out?

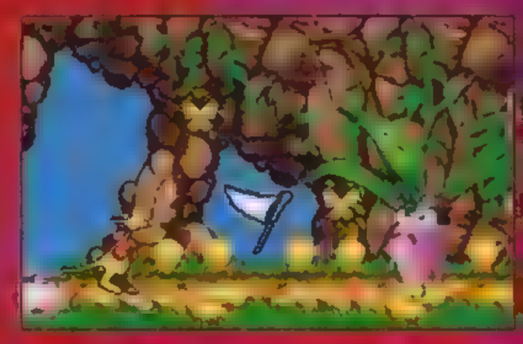
Of course, this means that a certain amount of people who have an insane attachment to moving platforms, bonus mushrooms and cute animals with a great talent for jumping around will still want to add this frankly dull adventure to their collection, so let's give a little credit where a little credit's due. One addition to the standard fare here is the chance to collect keys before finding a magical keyhole, which gives access to a special bonus level. Come to think of it, that's not as original as we thought.

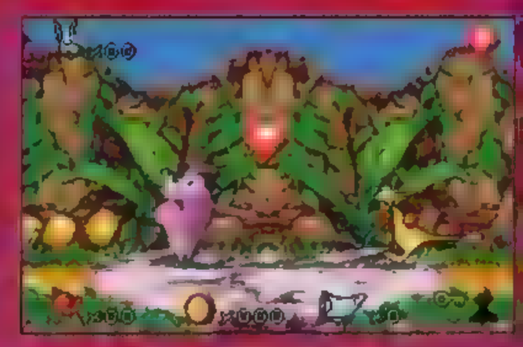
Moribund Marsupial

There are also a few breaks from side-scrolling boredom, with a snowboarding level, an insane spin in a spaceship and a surfing level. But they're simply not fun! Like practically everything else in the game, they're either irritatingly tricky or bemusingly simple. This game's idea of a challenge is to pit you against an opponent that refuses to be hit, as is clearly visible from the boss levels. The ways of killing each boss are completely obvious, but as each hit they take causes half a millimetre of damage to their massive energy bars, it's a long and boring process to get to the next level. You could just not bother, though, and instead spend a few minutes guessing the irritating passcode to the next level. In fact, that would probably be more entertaining. All in all, this is the kind of game that gives platformers a bad name. No effort has made to introduce advanced features, link-up options or anything. The tunes are rubbish, the idea is tedious and the price is colossal. Let's hope this kangaroo will now hang up his gloves.

Jem







Kangaroos: What Are They Like?

A load of cack

By Professor Skippy Bounder

The kangaroo gets its name from the latin Kanga, meaning 'This animal is called a' and Roo meaning 'kangaroo'. They were discovered in 1947 by a Nazi war criminal called Geoff, who hid inside a startled kangaroo's pouch until 1964, when he decided to pop out for a 7-Up and was discovered by Winston Churchill, who was disguised as a duck-billed platypus. Although the kangaroo likes nothing better than relaxing in the evening with a good brandy and a couple of 'gentleman's magazines', it has a vicious temper, and can often be found spreading nasty rumours about koala bears to passing dingos. Although popular in Australia, they are native to my local zoo. Can I go home now, mister?

Professor Bounder really, really likes kangaroos. They're the closest he has to friends.

You simply jump around waiting for the next bleeding spike to avoid, and wonder who the hell thought the game was a good idea. Does anyone out there have any interest in creating a novel, involving platform-type game?

Whatever you do, don't cross the streams! Oh no, that was Ghostbusters wasn't it? Well, same thing really.

... and then shoot the turtle thing, the worm underneath, the other one and ... you bored yet?!

Alienators: Evolution Continues...

Shooting aliens with a gun? What a novel idea!

Right. If a game comes around that really is mind-numbingly banal, we usually just ignore it, but we've decided to make a special exception with *Alienators* – to try and make an example of these lazy platformers once and for all. So, this review should stand as a warning to all games designers – if you have something like this in mind for your next cartoon or movie licence, you're in the wrong job!

Devolution!

Us limeys weren't even aware that they had made a cartoon series out of this year's reasonably funny *Ghostbusters* re-hash *Evolution*. But it seems that they have, and it seems to be pretty much a re-hash of *The Real Ghostbusters*, with the same soppy child-friendly kind of translation. But if we were really lazy and had to make a videogame out of this uninspiring cartoon, it probably would be like this re-hash of bad platformers.

Men In Weird Suits

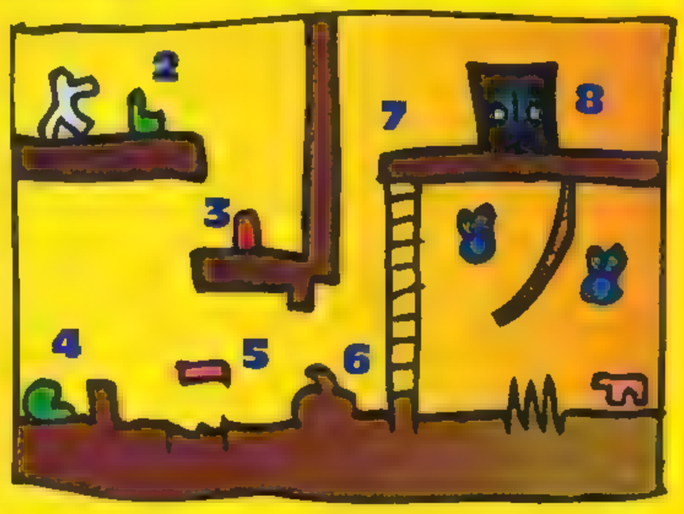
In fact, this is almost precisely the same game as the recent *Men In Black* game for the GBA, which we didn't review as it was too awful to think about. This cartridge boasts no more than twelve levels in which you play the David Duchovny-type character Dr Ira Kane. Guess what he does? He climbs ladders, jumps across slime pits, shoots aliens and picks up... things. Impressed yet? You get a choice of gun and a few different aliens, but there's nothing else here at all. Which leaves one question for the creators: will you really look back at this title with any pride?

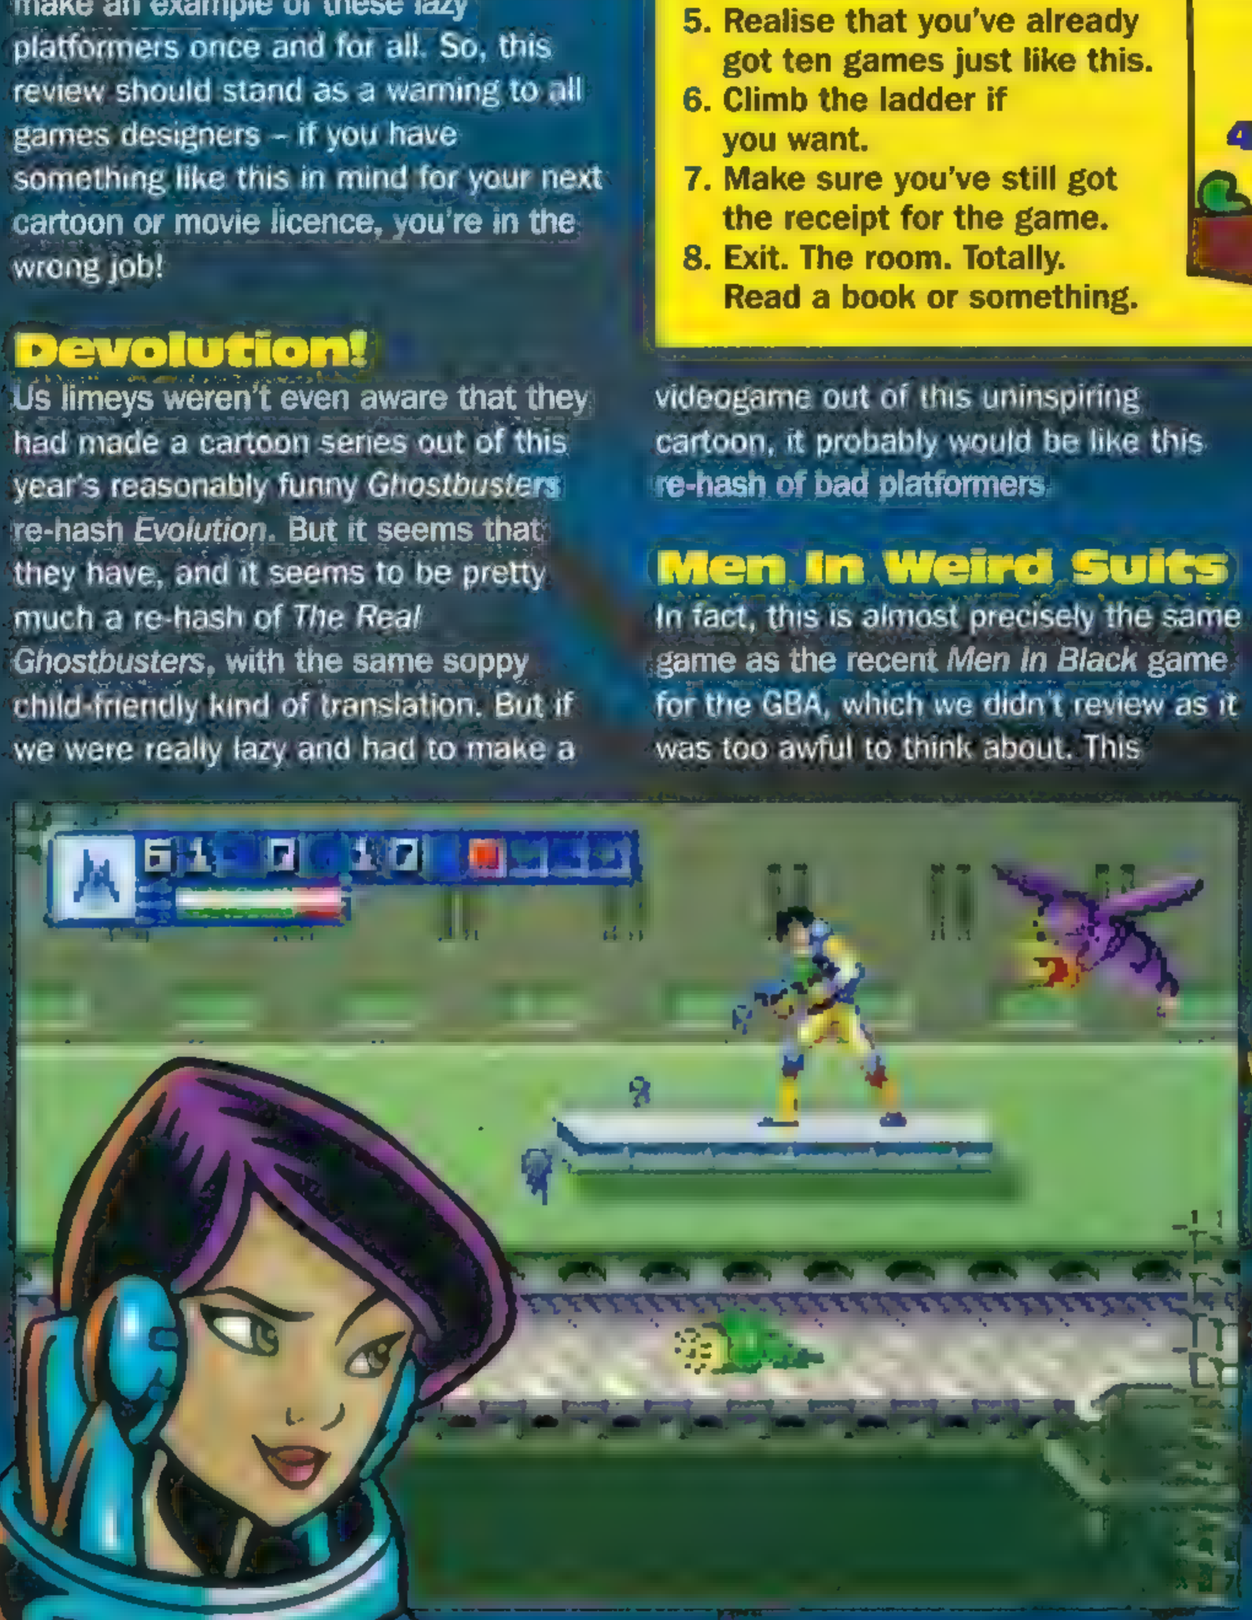
Jem

Alienators: MAPPED!

As we got a little bored of this game after four of the twelve levels, we thought we'd give you this guide on how to get through the game, skilfully drawn on an old beer mat. Here's the key:

1. Start point.
2. Kill the first alien.
3. Pick up bullet/health thingy.
4. Kill another alien if you're in the mood.
5. Realise that you've already got ten games just like this.
6. Climb the ladder if you want.
7. Make sure you've still got the receipt for the game.
8. Exit. The room. Totally. Read a book or something.





In my opinion...

If only the evolution hadn't continued!

At first I thought Jem was being a little harsh. The game looked okay and played okay, but the further I got the worse it got. It's pretty dull stuff – move along, climb, shoot, pick up. And it's far too easy. No matter how many times I tried to get killed (in order to end the game and get on with something more interesting, like homework) I just couldn't die! And usually I'm rubbish at this type of game and get killed within the first two minutes!

Adding a backstory and characters is always a good move to make the player care a little more about joining up coloured bricks and suchlike. In this case, we have the story of poor old Princess Dazzle, whose brown jewels have been ransacked for their gems. In order to get all 24 back, her two friends, a boy alchemist and girl magician who you get to re-name at the start, must fight the bandits, each other and time itself to reclaim all the jewels. Super Bust-A-Move

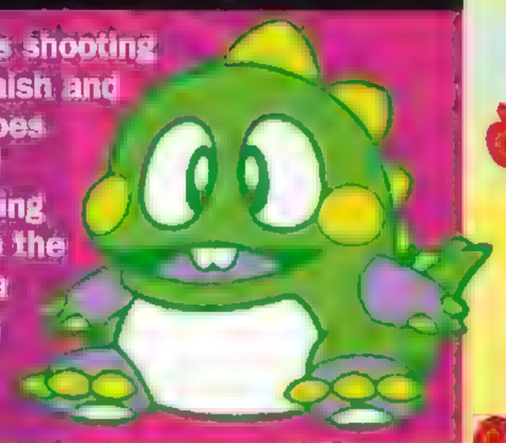
That little dragon's still trying to get his balls together!

Since Bub and Bob first shuffled into the videogame world, fifteen years ago, they have appeared in more puzzle games than the number four. From the platform-style antics of *Rainbow Islands* to the recent *Bust-A-Move Millennium*, you can always rely on those strange little scaly chaps for hours of pointless quick-fire fun. But this is their first outing on the GBA. Is this particular game style worth paying an Advance price for?

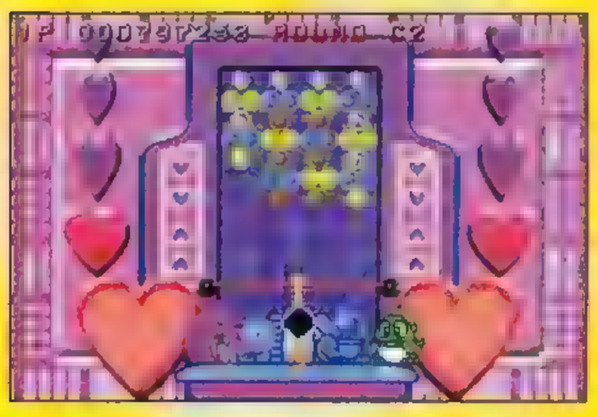
Mrs Anita Know Should Just Get Lost

Well, yes. It's all very nice I'm sure, little dragons shooting coloured balls up in the air and making them vanish and all that, but what I want to know is WHY? Why does the dragon want to clear rows of coloured balls? Where do they come from? Are the creatures being paid for this service, or are they even dragons in the first place? Do dragons exist? And why is there a farting shark in the middle of all this? I think it's disgusting and, to be perfectly honest, I don't think any of this ever happened. It's all lies!



Hubba Bubba

You do get an awful lot of options for your cash, it has to be said. You can battle against either the CPU or a pal via link cable, you also get Training, (extremely easy mode) Normal, (the game itself) and Classic (the same, but with no frills). Otherwise, the game is the same old, instantly recognisable, shoot-coloured-sticky-balls-up-in-the-air-to-clear-the-deck puzzle action, except this time with glorious details.



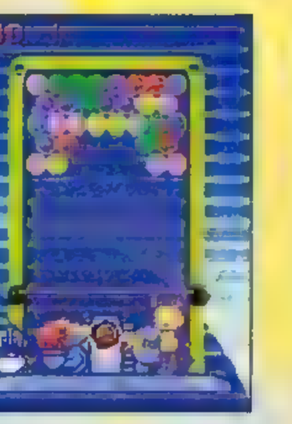
Oooooh, look at the pweety colours and the baubly things.

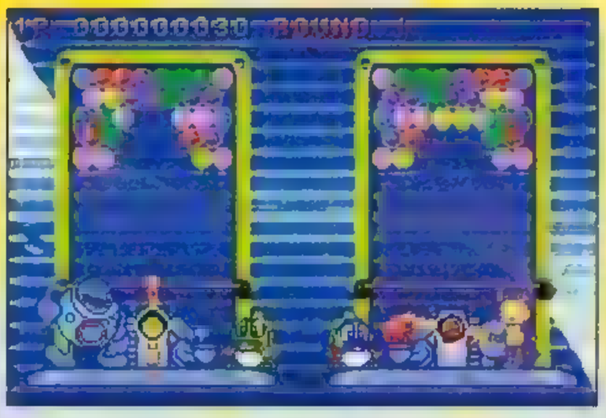
Wrigley's Spearmint

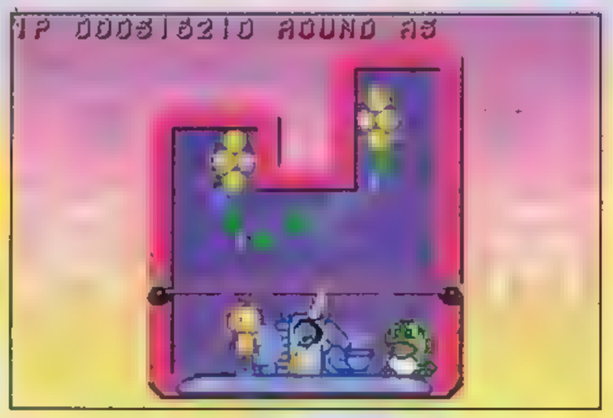
Possibly the major bonus offered by this version is the fantastically detailed graphics. Little creatures accompany you from level to level and dance about a bit, depending on how you're doing. There's even a farting shark! Honestly!

But despite all these groovy improvements, the gameplay remains exactly the same, so if you have the GBC version of the game, you'd be a fool to go out and get this. In fact, if it is mainly gameplay that matters to you, go and get the GBC version for a tenner, rather than shelling out thirty five quid for this visually souped-up version.

Jem







In my opinion...

Oh, go on, just one more go, please...

The graphics are great and the sound is lively and bouncy, suiting the game down to the ground. However, it is nothing new, and if you have a *Bust-A-Move* game for your Game Boy already, there's really not much point in getting this one. On the other hand, if you've not got one in your collection, go out and buy this game now! It's totally addictive and will keep you entertained for hours, and there's link-up too!

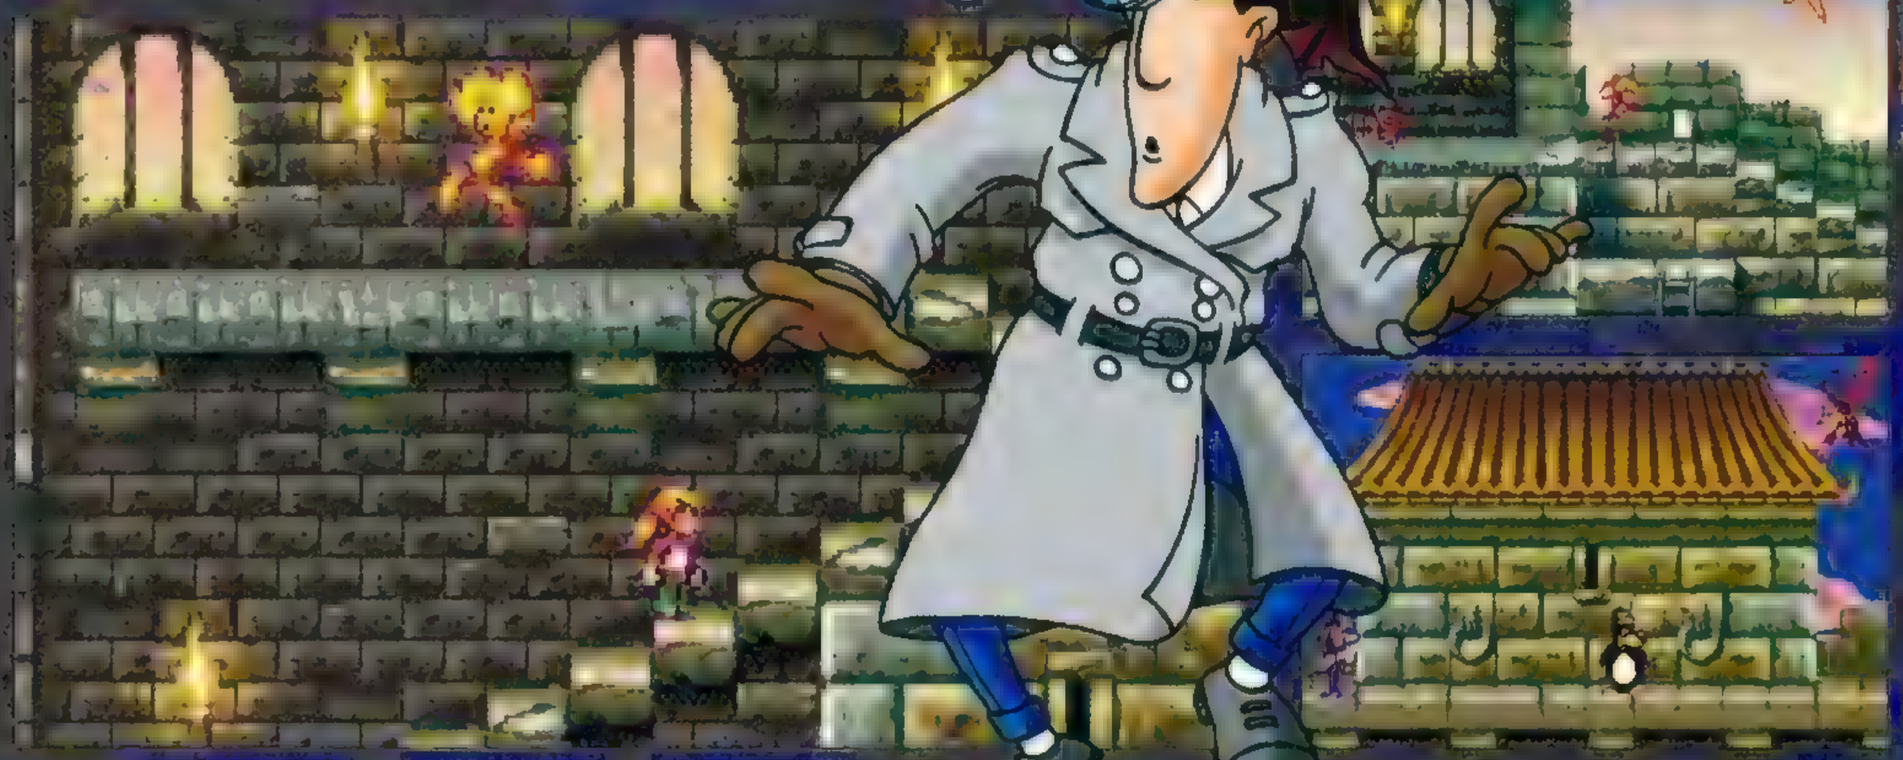
"Super is not too strong a word!"

Go, go, gadget arms... oh, no, it's Penny. Okay – go, go little blond girl, foil the evil Claw!



Inspector Gadget Advance Mission

It's Go, Go Game Boy Advance for the tin-pot crime fighter!

The Game Boy Color outing for the Inspector Gadget team must have been a success, because they've changed very little for this new outing, except for the quality of the graphics. The main requirement for enjoying this game is a liking for the cartoon series about the frankly rubbish robocop, his far more useful young niece Penny and intelligent pooch Brain. And I always found the show far better dubbed into Welsh, to be honest.

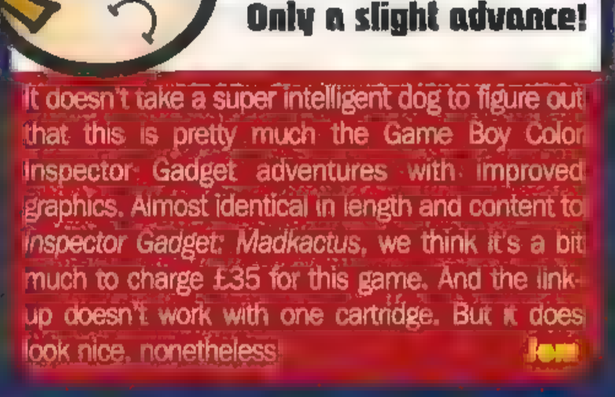
Three Of A Kind

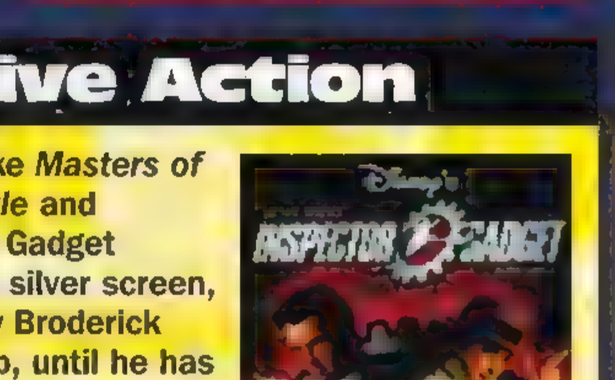
Still, this is a fine platformer, with stunning graphics and enough genuinely confusing puzzles to reward you for surviving to the end of each level. As you make your way through several cities, including London, Paris, New York and the Egyptian desert (trying, once again, to foil the evil Claw's plans to turn the population of the world mental, or something) you get the option to swap between the three heroes, each with their own abilities. Brain can super-jump and disguise himself as a penguin, Penny can control robots and swim, and Gadget can use dynamite, plus you're given a scant tutorial at first to learn the basic moves.

Go, Go, Go Away Gadget!

Sadly, the game relies on a pathetic password system, and only boasts a small handful of levels, allowing you to complete the whole thing in one afternoon. Which isn't very good for thirty five quid, no matter how many things Gadget can do with his hat. Still, there is a link-up version of the game, if you know anyone else rich enough to have bothered to buy the game. Unlikely.

Nerys





In my opinion...

Only a slight advance!

It doesn't take a super intelligent dog to figure out that this is pretty much the Game Boy Color Inspector Gadget adventures with improved graphics. Almost identical in length and content to *Inspector Gadget: Madkactus*, we think it's a bit much to charge £35 for this game. And the link-up doesn't work with one cartridge. But it does look nice, nonetheless

Jon

The Curse Of Live Action

After the 'huge successes' of movies like *Masters of the Universe*, *Popeye*, *Rocky & Bullwinkle* and *Flintstones: Viva Rock Vegas*, Inspector Gadget decided to make the same move to the silver screen, with worse than mixed results. Matthew Broderick played John Brown, a pretty useless cop, until he has a robocop makeover and emerges as a pretty useless cop with a helicopter in his hat. Lowlights of this Disney disaster included Rupert Everett as the less than mysterious Claw, and Brain appearing as a rather dull, ordinary looking dog. Worth avoiding.

Trusty

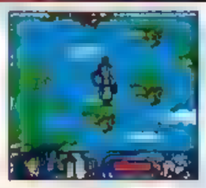
- Great graphics – it's the best Gadget's ever looked on a handheld.
- Some interesting link-up options, if you ever get to see them.

Rusty

- The game isn't very long and you need two carts for link-up.
- It's hardly changed in game style since the Game Boy Color version.

Or you could try...

Inspector Gadget: MadKactus
From Ubi Soft



Pretty much the same game, to be honest. Seriously good GBC action and ten quid cheaper!

Graphics ★★★★★
Go go Gadget graphics! Very lush visuals throughout.

Sound ★★★
No original theme tune and annoying jingly background tunes.

Playability ★★★
Not much of a challenge, but it's fun while it lasts.

Lastability ★★
Would get three stars, but the dual cart link-up is silly.

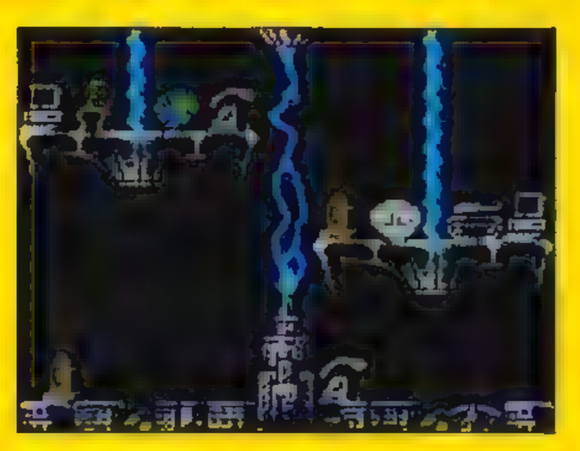
"Cybernetic silliness for a ridiculous price!"

Keep The Balance!



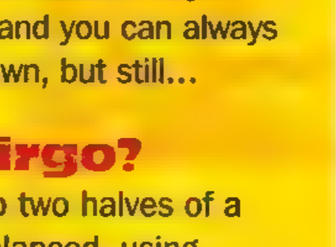
Hang on, fourteen minus three, or was it plus three? Makes... for boredom.

It's a strange little game, *Keep The Balance!* Certainly not deserving of complete damnation, but it's hard to imagine why anyone would want to buy it. The graphics aren't bad, and you can always turn the irritating tune down, but still...

Are You A Virgo?

The basic idea is to keep two halves of a massive set of scales balanced, using many strange monsters with different weights. These beasts appear on a conveyor belt across the bottom and you have to spring them up to replace, add to or (if you get a weight carnivore thingy) totally destroy the existing weights. If you leave it too long, the scales will overbalance and you'll basically be in schmuck, mate. It can actually get quite addictive, until you realise that there are only 80 levels. Sounds like a lot, but they only last about two seconds each, which means that highly intelligent folk (like me) can complete the entire game in an hour or less.

Simon



In my opinion...

Yep, I've completed it already, boss!

But that's not the point really, no matter what Simon says. This game could really help younger kids with their maths. It even had me desperately trying to remember what I was taught at school! And it's also extremely weird, which is always a bonus. Twenty quid's far too much for it though.

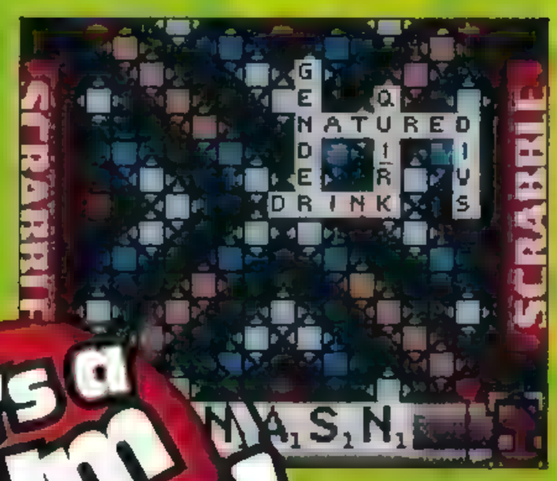
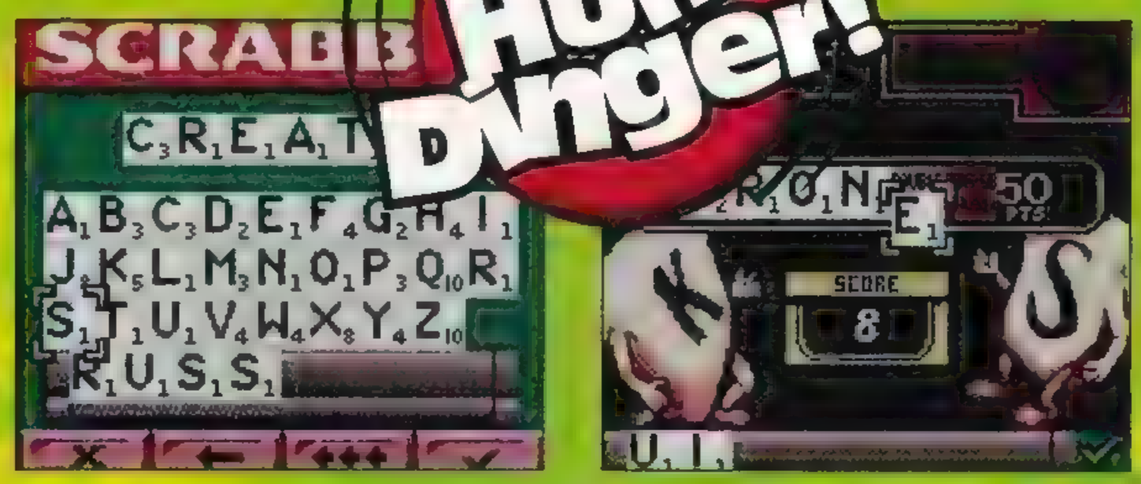
"This game is good to help kids learn, but really it is a weird, educational waste of twenty quid."

Poor Nerys, she needs alcohol to get through anything!

You can tell she's been drinking, what's a '_DIVS'?!





Scrabble

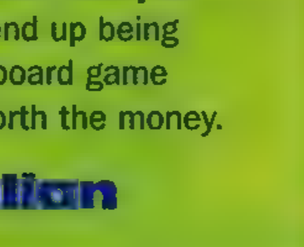
Please, please let me get 'quinquevalent'!

We weren't going to bother reviewing this Ubi Soft diamond, but once we'd actually had a look at the cart, we just had to shout about it! Games that require you to use your brain rather than your thumb can quite easily end up being ignored, but this is one board game conversion that's well worth the money.

Sesquipedalian Skirmish!

This game apes the original Scrabble so closely that it's a bit pointless to explain how it works. The one problem with buying this for yourself is that the Vs CPU game really doesn't work. You have to wait ages for the strange characters that they pit you against to come up with a word – and you either rig it so you win every time, or the CPU trashes you without a thought. No, the real way to play this game is with a group of friends. Between the game itself and the excellent Conundrum option, this will make any wait in a queue flash by, and you'll quite possibly learn something too.

Nerys



In my opinion...

It's a super Scrabble scramble folks!

I'd really have to go out and buy this game if we hadn't just got it for free. Everything you need is here! The cartridge has everything you get in a Scrabble box, plus the dictionary and extra Conundrum game – and the best thing is, you'll never lose a letter! If you don't have this in your collection, you're a no-brainer!
